MANAGEMENT DISCUSSION AND ANALYSIS

FINANCIAL PERFORMANCE WITH RESPECT TO OPERATIONAL PERFORMANCE

During the year the Company earned total income by way of dividend, sale of Investment and interest income aggregating to Rs. 10954.70 lakhs. Net profit for the year amounted to Rs.10540.61 lakhs as compared to Rs. 30,942.30 lakhs in the previous year.

The share capital of the company as on 31st March, 2025 stood at Rs. 3209.06 lakhs and Reserves and Surplus at Rs. 81823.48 lakhs (including capital reserve of Rs. 20345.06 lakhs).

During FY25, significant changes in the key financial ratios as per listing regulations were as follows:

Ratio	FY 2024-25	FY 2023-24	% Change	Reason
Return on Net Worth = PAT / Net Worth	16.29%	47.62%	(65.78%)	The reduction in Return on Net Worth for the current financial year is primarily attributed to the absence of exceptional transaction i.e profit on sale of shares that positively impacted the Net worth last year.
Current Ratio = Current Assets / Current Liabilities	7.93	239.41	(96.69%)	The decrease in the Current Ratio during FY'25 is primarily attributed to an increase in current liabilities, specifically due to the accumulation of unspent Corporate Social Responsibility (CSR) funds. These unutilized CSR amounts, classified as current liabilities in accordance with statutory requirements, have contributed to the shift in the Company's liquidity indicators.

There were no other significant change in the key financial ratios as prescribed in the Listing Regulations.

INDEPENDENT AUDITOR'S REPORT

To The Members of

KAMA Holdings Limited

Report on the audit of the Standalone Financial Statements

Opinion

We have audited the accompanying standalone financial statements of **KAMA Holdings Limited** ("the Company"), which comprise the Balance Sheet as at March 31, 2025, the statement of Profit and Loss (including other comprehensive income), the Statement of Changes in Equity and the Cash Flow Statement for the year then ended and notes to standalone financial statements, including a summary of material accounting policies and other explanatory information (hereinafter referred to as "standalone financial statements").

In our opinion and to the best of our information and according to the explanations given to us, the aforesaid standalone financial statements give the information required by the Companies Act, 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Company as at March 31, 2025, its profit and total comprehensive income, its changes in equity and its cash flows for the year ended on that date.

Basis for Opinion

We conducted our audit of the standalone financial statements in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Act. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Standalone financial statements section of our report. We are independent of the Company in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India (ICAI) together with the independence requirements that are relevant to our audit of the standalone financial statements under the provisions of the Act and the Rules made thereunder, and we have fulfilled our other ethical responsibilities in accordance with these requirements and the ICAI's Code of Ethics. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Key Audit Matters

Key Audit matters are those matters that in our professional judgement were of most significance in our audit of the standalone financial statement of the current period. These matters were addressed in the context of our audit of standalone financials statement as a whole and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined that there are no key audit matters to be communicated in our report.

Information Other than the Standalone financial statements and Auditor's Report Thereon

THE COMPANY'S BOARD OF Directors is responsible for the preparation of the other information. The other information comprises the information included in the Board's Report including Annexures to Board's Report, but does not include the standalone financial statements and our auditor's report thereon. Our opinion on the standalone financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the standalone financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the standalone financial statements or our knowledge obtained during the course of our audit or otherwise appears to be materially misstated.

If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Management Responsibility for the Standalone financial statements

The Company's management and Board of Directors are responsible for the matters stated in section 134(5) of the Companies Act, 2013("the Act") with respect to the preparation of these standalone financial statements that give a true and fair view of the financial position, financial performance and cash flows of the Company in accordance with the accounting principles generally accepted in India. This responsibility also includes maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding the assets of the Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the standalone financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error.

In preparing the standalone financial statements, management is responsible for assessing the Company's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Company or to cease operations, or has no realistic alternative but to do so. The Board of Directors are responsible for overseeing the Company's financial reporting process.

Auditor's Responsibilities for the Audit of the Standalone financial statements

Our objectives are to obtain reasonable assurance about whether the standalone financial statements as a whole

are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these standalone financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the standalone financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Company's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the standalone financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Company to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content
 of the standalone financial statements, including the
 disclosures, and whether the standalone financial
 statements represent the underlying transactions and
 events in a manner that achieves fair presentation.

Materiality is the magnitude of misstatements in the standalone financial statements that, individually or in aggregate, makes

it probable that the economic decisions of a reasonably knowledgeable user of the standalone financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) Planning the scope of our audit work and in evaluating the results of our work; and (ii) To evaluate the effect of any identified misstatements in the standalone financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the standalone financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditor's report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Report on Other Legal and Regulatory Requirements

- As required by the Companies (Auditor's Report) Order, 2020 ("the order"), issued by the Central Government of India in terms of sub section (11) of section 143 of the Companies Act, 2013, we give in the "Annexure A", a statement on the matters specified in paragraphs 3 & 4 of the order, to the extent applicable.
- 2. As required by section 143(3) of the Act, we report that:
 - We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purpose of our audit.

 - The Company did not have any long-term contracts including derivative contracts for which there were any material foreseeable losses.
 - There has been no delay in transferring amount required to be transferred to Investor Education and Protection Fund by the Company.
 - iv. (a) The Management has represented that, to the best of its knowledge and belief, no funds (which are material either individually or in the aggregate) have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Company to or in any other person or entity, including foreign entity ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of

- the Company ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries:
- (b) The Management has represented, that, to the best of its knowledge and belief, no funds (which are material either individually or in the aggregate) have been received by the Company from any person or entity, including foreign entity ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Company shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
- (c) Based on the audit procedures that have been considered reasonable and appropriate in the circumstances, nothing has come to our notice that has caused us to believe that the representations under sub-clause (i) and (ii) of Rule 11(e), as provided under (a) and (b) above, contain any material misstatement.
- v. The interim dividends declared and paid by the Company during the current year and until the date of this audit report is in accordance with section 123 of the Companies Act 2013.
- vi. Based on our examination, which included test checks, the Company has used accounting software systems for maintaining its books of account for the financial year ended March 31, 2025 which have the feature of recording audit trail (edit log) facility and the same has operated throughout the year for all relevant transactions recorded in the software systems. Further, during the course of our audit we did not come across any instance of the audit trail feature being tampered with and the audit trail has been preserved by the Company as per the statutory requirements for record retention.

ANNEXURE- "B" TO THE INDEPENDENT AUDITOR'S **REPORT**

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

Opinion

We have audited the internal financial controls over financial reporting of KAMA Holdings Limited ("the Company") as of March 31, 2025 in conjunction with our audit of the standalone financial statements of the Company for the year ended on that date.

In our opinion, to the best of our information and according to the explanations given to us, the Company has, in all material respects, an adequate internal financial controls system over financial reporting and such internal financial controls over financial reporting were operating effectively as at March 31, 2025, based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Management's Responsibility for Internal Financial Control

The Company's management is responsible for establishing and maintaining internal financial controls based on the internal control over financial reporting criteria established by the Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013.

Auditors' Responsibility

Our responsibility is to express an opinion on the Company's internal financial controls over financial reporting based on our audit. We conducted our audit in accordance with the Guidance Note on Audit of Internal Financial Controls over Financial Reporting (the "Guidance Note") and the Standards on Auditing, issued by ICAI and deemed to be prescribed under section 143(10) of the Companies Act, 2013, to the extent applicable to an audit of internal financial controls, both applicable to an audit of Internal Financial Controls and, both issued by the Institute of Chartered Accountants of India. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls over financial reporting was established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls system over financial reporting and their operating effectiveness. Our audit of internal financial controls over financial reporting included obtaining an understanding of internal financial controls over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the standalone financial statements, due to fraud or error.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion on the Company's internal financial controls system over financial reporting.

Meaning of Internal Financial Controls over Financial Reporting

A company's internal financial control over financial reporting is a process designed to provide reasonable assurance

regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls Over Financial Reporting

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in condition or that the degree of compliance with the policies or procedures may deteriorate.

Depreciation is calculated on a pro rata basis except, assets costing upto Rs. 5,000 each, which are fully depreciated in the year of purchase.

An item of property, plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the income statement when the asset is derecognised.

The estimated useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

4 Impairment of tangible and intangible assets

The Company assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the company estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use.

Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets.

Impairment loss is recognised when the carrying amount of an asset or CGU exceeds its recoverable amount. In such cases, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples or other available fair value indicators.

An assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the company estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years.

5 Provisions and Contingent Liabilities

Provisions

The company recognises a provision when there is a present obligation (legal or constructive) as a result of past events and it is more likely than not that an outflow of resources would be required to settle the obligation and a reliable estimate can be made.

When the company expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain.

The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent liability

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the company or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The company does not recognize a contingent liability but discloses its existence in the financial statements unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent liabilities and commitments are reviewed by the management at each balance sheet date.

6 Revenue recognition

- a) Dividend income from investments is recognised when the shareholder's right to receive payment has been established and it is probable that the economic benefits will flow to the company.
- b) Interest income is recognised when it is probable that the economic benefits will flow to the company using the effective interest rate and the amount of income can be measured reliably. Interest income is accrued on time basis, by reference to the principal outstanding.

7 Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

a) Current tax

Current income tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss account i.e. in Other comprehensive income or equity. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

b) Deferred tax

Deferred tax is provided on temporary differences between the tax bases of assets and liabilities and their carrying amounts at the reporting date.

Deferred tax is measured using the tax rates and the tax laws enacted or substantively enacted as at the reporting date.

Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the company has a legally enforceable right for such set off.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered. Deferred tax assets are recognised for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax relating to items recognised outside profit or loss is recognised in other comprehensive income or in equity.

8 Employee benefits

Short term employee benefits

Wages and salaries including non monetary benefits that are expected to be settled within the operating cycle after the end of the period in which the related services are rendered and are measured at the undiscounted amount expected to be paid.

Defined contribution plans

Provident fund administered through Regional Provident Fund Commissioner and Employees' State Insurance Corporation are defined contribution schemes. Contributions to such schemes are charged to the statement of profit and loss in the year when employees have rendered services entitling them to the contributions. The company has no obligation, other than the contribution payable to such schemes.

Defined benefit plans

The company has defined benefit plan such as gratuity, provident fund for certain category of employees administered through a recognised provident fund trust.

Provision for gratuity, provident fund for certain category of employees administered through a recognised provident fund trust are determined on an actuarial basis at the end of the year and charged to statement of profit and loss, other than remeasurements. The cost of providing these benefits is determined using the projected unit credit method.

Remeasurements, comprising of actuarial gains and losses and the effect of the asset ceiling, (excluding amounts included in net interest on the net defined benefit liability and return on plan assets), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through other comprehensive income in the period in which they occur. Re-measurements are not reclassified to statement of profit and loss in subsequent periods.

Other long term employee benefits

The company also has other long term benefits plan such as compensated absences. Provision for compensated absences are determined on an actuarial basis at the end of the year and charged to Statement of Profit and Loss. The cost of providing these benefits is determined using the projected unit credit method.

9 Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

10 Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

11 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

A) Financial assets

Initial recognition and measurement

All financial assets are recognized initially at fair value, plus in the case of financial assets not recorded at fair value through profit or loss (FVTPL), transaction costs that are attributable to the acquisition of the financial asset. However, trade receivables that do not contain a significant financing component are measured at transaction price.

Subsequent measurement

For purposes of subsequent measurement, financial assets of the company are classified in three categories:

- a) At amortised cost
- b) At fair value through profit and loss (FVTPL)
- c) At fair value through other comprehensive income (FVTOCI)

Financial asset is measured at amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in other income in the statement of profit and loss. The losses arising from impairment are recognised in the statement of profit and loss. This category generally applies to trade and other receivables.

Financial assets not classified as measured at amortised cost or FVOCI as are measured at FVTPL. Financial assets included within the FVTPL category are measured at fair value with all changes recognised in the statement of profit and loss.

Equity Investments

All equity investments in the scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading are measured at fair value through profit and loss.

For all other equity instruments, the company may make an irrevocable election to present in other comprehensive income subsequent changes in the fair value.

The company makes such election on an instrument by instrument basis. The classification is made on initial recognition and is irrevocable.

If the company decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognised in other comprehensive income. This cumulative gain or loss is not reclassified to statement of profit and loss on disposal of such instruments.

Investments representing equity interest in subsidiaries are carried at cost less any provision for impairment.

Derecognition

A financial asset (or, where applicable, a part of a financial asset) is primarily derecognised (i.e. removed from the balance sheet) when:

- a) The rights to receive cash flows from the asset have expired, or
- b) The company has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (i) the company has transferred substantially all the risks and rewards of the asset, or (ii) the company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the company has transferred its rights to receive cash flows from an asset or has entered into a passthrough arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the company continues to recognise the transferred asset to the extent of the company's continuing involvement. In that case, the company also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the company has retained.

Impairment of financial assets

The company recognizes loss allowance using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. For all financial assets with contractual cash flows other than trade receivable, ECLs are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of ECL (or reversal) that is required to adjust the loss allowance at the reporting date is recognised as an impairment gain or loss in the Statement of Profit and Loss.

B) Financial liabilities and Equity instruments

Initial recognition and measurement

All financial liabilities are recognised initially at fair value, net of directly attributable transaction costs, if any.

The company's financial liabilities include borrowings and trade and other payables.

Subsequent measurement

Borrowings

Borrowings are subsequently measured at amortised cost. Any differences between the proceeds(net of transaction cost) and the redemption/repayment amount is recognised in profit and loss over the period of the borrowings using the Effective interest rate method.

Trade and other payables

Trade and other payables represent the liabilities for goods and services provided to the company prior to the end of the financial year which are unpaid.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the statement of profit or loss.

Equity Instruments

Equity Instruments are any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

Debt or equity instruments issued by the company are classified as either financial liability or as equity in accordance with the substance of contractual arrangements and the definitions of a financial liabilities and an equity instruments.

12 Fair value measurement

The company measures some of its financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- a) In the principal market for the asset or liability, or
- b) In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the company. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use. The company uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- a) Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- b) Level 2 inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- c) Level 3 inputs for the asset or liability that are not based on observable market data (unobservable inputs).

For assets and liabilities that are recognised in the financial statements on a recurring basis, the company determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the company has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

13 Dividend

The Company recognises a liability to make cash distributions to equity holders when the distribution is authorised and the distribution is no longer at the discretion of the Company. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

C Accounting judgements, estimates and assumptions

The preparation of financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Judgements, estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected. In particular, information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the financial statements is included in the following notes.

- · Assessment of useful life of property, plant and equipment
- · Estimation of obligations relating to employee benefits (including actuarial assumptions)

23. Post-Employment Benefit Plans:

The Company sponsors funded defined benefit plans for qualifying employees. The defined benefit plans are administered by separate funds which are legally separate from the Company. These plans are:

Provident fund for certain category of employees administered through a recognised provident fund trust.

(i) These plans typically expose the company to actuarial risks such as investment risk, interest rate risk, longevity risk and salary risk.

Investment Risk

The probability or likelihood of occurrence of losses relative to the expected return on any particular investment.

Salary Risk

The present value of defined benefit plan is calculated with the assumption of salary increase rate of plan participants in future. Deviation in rate of increase in salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.

Interest Risk

The plan exposes the Company to the risk of fall in interest rates. A fall in interest rates will result in an increase in the ultimate cost of providing the above benefit and will thus result in an increase in value of the liability.

Longevity Risk

The present value of defined benefit plan liability is calculated by reference to the best estimate of the mortality of plan participants both during and after employment. An increase in the life expectancy of the plan participants will increase the plans liability.

(a) Defined Contribution Plans:

Contributions paid / payable to defined contribution plans comprising of provident fund, pension fund, superannuation fund etc., in accordance with the applicable laws and regulations are recognised as expenses during the period when the contributions to the respective funds are due.

30. Financial Instruments & Risk management

30.1 Capital management

The Company is cash surplus and has issued only equity share capital. The Company is a Core Investment Company (CIC) within the meaning of Core Investment Companies (Reserve Bank) Directions, 2016 and does not require registration with Reserve Bank of India under the said directions.

The cash surpluses are currently invested in equity instruments and inter -corporate loans depending on economic conditions in line with investment policy set by the Management. Safety of capital is of prime importance to ensure availability of capital for operations. Investment objective is to provide safety and adequate return on the surplus funds.

The Company does not have any borrowings.

30.2 Financial Risk Management

The Company being a Core Investment Company as per the Core Investment Companies (RBI) Directions, 2016 is required to invest or lend majority of it's fund to subsidiaries. The Company's principal financial liabilities comprise trade and other payables. The main purpose of these financial liabilities is to support Company's operations. The Company's principal financial assets include inter corporate deposits, loans, cash and cash equivalents and other receivables.

The Company is exposed to market risk, credit risk, liquidity risk and operational and business risk. The Company's management oversees the management of these risks. The Company's senior management is supported by a Risk Management Committee that advises on financial risks and the appropriate financial risk governance framework for the Company. The major risks are summarised below:

Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. In the case of the Company, market risk primarily impacts financial instruments measured at fair value through profit or loss.

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company does not have exposure to the risk of changes in market interest rate as it does not have debt obligations.

Credit risk

Credit risk is the risk that the counterparty will not meet its obligations under a financial instrument or a customer contract, leading to a financial loss. The Company is exposed to credit risk from its financing activities towards inter corporate deposits to subsidiaries, where no significant impact on credit risk has been identified.

Equity price risk:

The Company's investment in subsidiaries are accounted at cost in the financial statement net of impairment. The expected cash flow from these entities are regularly monitored to identify impairment indicators.

Liquidity risk

Liquidity risk is defined as the risk that the Company will not be able to settle or meet its obligations on time or at a reasonable price. The Company's corporate treasury department is responsible for liquidity, funding as well as settlement management. In addition, processes and policies related to such risks are overseen by senior management. The Company manages its liquidity requirement by analysing the maturity pattern of the Company's cash flow of financial assets and financial liabilities. The Company's objective is to maintain a balance between continuity of funding and flexibility through issuance of equity shares etc. The Company invests its surplus funds in subsidiary companies.

The table below analyse the Company's financial liabilities into relevant maturity profiles based on their contractual maturities:

INDEPENDENT AUDITOR'S REPORT

To the Members

KAMA Holdings Limited

Report on Audit of the Consolidated Financial Statements

Opinion

We have audited the accompanying consolidated financial statements of KAMA Holdings Limited (hereinafter referred to as the "the Holding Company") and its subsidiary companies (Holding Company and its subsidiary companies together referred to as "the Group") which comprise the Consolidated Balance Sheet as at March 31, 2025, the Consolidated Statement of Profit and Loss (including Other Comprehensive Income), the Consolidated Statement of Changes in Equity and the Consolidated Cash Flow Statement for the year then ended and notes to consolidated financial statements, including a summary of material accounting policies and other explanatory information (hereinafter referred to as "consolidated financial statement").

In our opinion and to the best of our information and according to the explanations given to us, and based on the consideration of reports of other auditors on consolidated financial statements of such subsidiaries as were audited by the other auditors, the aforesaid Consolidated financial statements give the information required by the Companies Act 2013 ("the Act") in the manner so required and give a true and fair view in conformity with the Indian Accounting Standards prescribed under section 133 of the Act read with the Companies (Indian Accounting Standards) Rules, 2015, as amended, ("Ind AS") and other accounting principles generally accepted in India, of the state of affairs of the Group as at March 31, 2025, of its consolidated profit and total comprehensive income, consolidated changes in equity and consolidated cash flows for the year then ended.

Basis for Opinion

We conducted our audit in accordance with the Standards on Auditing (SAs) specified under section 143(10) of the Companies Act, 2013. Our responsibilities under those Standards are further described in the Auditor's Responsibilities for the Audit of the Consolidated Financial Statements section of our report. We are independent of the Group in accordance with the Code of Ethics issued by the Institute of Chartered Accountants of India and relevant provisions of the Companies Act, 2013, and we have fulfilled our other ethical responsibilities in accordance with these requirements. We believe that the audit evidence obtained by us along with the consideration of audit reports of the other auditors referred to in "Other Matters" paragraph below, is sufficient and appropriate to provide a basis for our opinion on the consolidated financial statements.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. We have determined that there are no key audit matters for Holding Company to be communicated in our report. Key audit matters as considered in the independent auditors' report on the consolidated financial statements of subsidiary company (SRF Limited) and reported by their auditor are described below:

The key audit matter

Auditor's Response

1. Accounting financial statements)

> The Group* uses derivative financial instruments to mitigate foreign currency risk primarily through foreign currency forward exchange contracts. Further, the uses hedge Group relationship designation . as per criteria set out in relevant Indian accounting standards.

Accounting thereof. including assessment of hedge effectiveness, and related presentation and disclosures of these transactions require significant judgement

Information Other than the Consolidated Financial Statements and Auditor's Report Thereon

The Holding Company's management and Board of Directors are responsible for the other information. The other information comprises the information included in the Holding Company's annual report, but does not include the consolidated financial statements and our auditor's report thereon.

Our opinion on the consolidated financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the consolidated financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the consolidated financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated.

If based on the work we have performed and based on the audit reports of other auditors, we conclude that there is a material misstatement therein, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of Management and Those Charged with **Governance for the Consolidated Financial Statements**

The Holding Company's management and Board of Directors are responsible for the preparation and presentation of these Consolidated financial statements in terms of the requirement of the Act that give a true and fair view of the consolidated financial position, consolidated financial performance, consolidated changes in equity and consolidated cash flows of the Group in accordance with the accounting principles generally accepted in India, including the Indian Accounting Standards (Ind AS) specified under Section 133 of the Act. The respective Board of Directors of the companies included in the Group are responsible for maintenance of adequate accounting records in accordance with the provisions of the Act for safeguarding of the assets of each Company and for preventing and detecting frauds and other irregularities; selection and application of appropriate accounting policies; making judgments and estimates that are reasonable and prudent; and design, implementation and maintenance of adequate internal financial controls, that were operating effectively for ensuring the accuracy and completeness of the accounting records, relevant to the preparation and presentation of the financial statements that give a true and fair view and are free from material misstatement, whether due to fraud or error which have been used for the purpose of preparation of the consolidated financial statements by the Directors of the Holding Company, as aforesaid.

In preparing the consolidated financial statements, the respective management and Board of Directors of the company/ entity included in the Group are responsible for assessing the

ability of each company/entity to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors either intends to liquidate the Company/entity or to cease operations, or has no realistic alternative but to do so.

The respective Board of Directors of the Companies/entity included in the Group are also responsible for overseeing the financial reporting process of each company/entity.

Auditor's Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with SAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with SAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal financial controls relevant to the audit in order to design audit procedures that are appropriate in the circumstances. Under section 143(3)(i) of the Act, we are also responsible for expressing our opinion on whether the Company has adequate internal financial controls system in place and the operating effectiveness of such controls.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management and Board of Directors.
- Conclude on the appropriateness of the Management and Board of Directors use of the going concern basis of accounting in preparation of consolidated financial statements and, based on the audit evidence obtained,

whether a material uncertainty exists related to events or conditions that may cast significant doubt on the appropriateness of this assumption. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Group to cease to continue as a going concern.

- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.
- Obtain sufficient appropriate audit evidence regarding the financial statements of the entities or business activities within the Group to express an opinion on the consolidated financial statements, of which we are the independent auditors. We are responsible for the direction, supervision and performance of the audit of the financial statements of such entities included in the consolidated financial statements of which we are the independent auditors. For the other entities included in the consolidated financial statements, which have been audited by other auditors, such other auditors remain responsible for the direction, supervision and performance of the audits carried out by them. We remain solely responsible for our audit opinion. Our responsibilities in this regard are further described in the section titled 'Other matter' in this audit report.

Materiality is the magnitude of misstatements in the consolidated financial statements that, individually or in aggregate, makes it probable that the economic decisions of a reasonably knowledgeable user of the consolidated financial statements may be influenced. We consider quantitative materiality and qualitative factors in (i) planning the scope of our audit work and in evaluating the results of our work; and (ii) to evaluate the effect of any identified misstatements in the consolidated financial statements.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

Other Matter

We did not audit the financial statements of eleven subsidiaries, whose financial statements reflect total assets of Rs. 21,56,621.73 lakhs (before consolidation adjustments) as at 31st March, 2025, total revenues of Rs. 14,72,173.79 lakhs (before consolidation adjustments) and net cash outflows of Rs.6,505.31 lakhs (before consolidation adjustments) for the year ended on that date, as considered in the consolidated financial statements, which have been audited by their respective independent auditors. The independent auditor's reports on financial statements of these subsidiaries have been furnished to us by the management and our opinion on the consolidated financial statements, in so far as it relates to the amounts and disclosures included in respect of these subsidiaries and our report in terms of sub section (3) of section 143 of the Act, in so far as it relates to the aforesaid subsidiaries are based solely on the audit reports of the other auditors.

Certain of these subsidiaries are located outside India whose financial statements and other financial information have been prepared in accordance with accounting principles generally accepted in their respective countries and which have been audited by other auditors under generally accepted auditing standards applicable in their respective countries. The Immediate Holding Company's management has converted the financial statements of such subsidiaries located outside India from accounting principles generally accepted in their respective countries to accounting principles generally accepted in India. Immediate Holding Company's Auditors have audited those conversion adjustments made by such Company's management. Our opinion in so far as it relates to the balances and affairs of such subsidiaries located outside India is based on the report of Immediate Holding Company's Auditors.

Our opinion on the consolidated financial statements, and our report on Other Legal and Regulatory Requirements below, is not modified in respect of the above matters with respect to our reliance on the work done and the reports of the other auditors.

Report on Other Legal and Regulatory Requirements

1. With respect to the matters specified in paragraphs 3(xxi)

and 4 of the Companies (Auditor's Report) Order, 2020 (the "Order"/ "CARO") issued by the Central Government in terms of Section 143(11) of the Act, to be included in the Auditor's report, according to the information and explanations given to us, and based on the CARO reports of the Companies issued by us and on the consideration of the CARO reports of the other auditors of its subsidiaries included in the consolidated financial statements , we report that there are no qualifications or adverse remarks in these CARO reports.

- As required by Section 143 (3) of the Act, based on our audit and on the consideration of reports of the other auditors on the consolidated financial statements of such subsidiaries as were audited by other auditors, as noted in the 'Other Matter' paragraph, we report, to the extent applicable, that:
 - a. We have sought and obtained all the information and explanations which to the best of our knowledge and belief were necessary for the purposes of our audit of the aforesaid consolidated financial statements.
 - b. In our opinion, proper books of account as required by law relating to preparation of the aforesaid consolidated financial statements have been kept so far as it appears from our examination of those books and the reports of the other auditors, except for the matter stated in the paragraph 2(i)(vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014.
 - c. The Consolidated Balance Sheet, the Consolidated Statement of Profit and Loss (including other comprehensive income), the Consolidated Cash Flow Statement and the Consolidated Statement of Changes in Equity dealt with by this report are in agreement with the books of accounts maintained for the purpose of preparation of the consolidated financial statements.
 - In our opinion, the aforesaid consolidated financial statements comply with the Indian Accounting Standards prescribed under Section 133 of the Act.
 - e. On the basis of the written representations received from the directors of the Holding Company as on 31st March, 2025 and taken on record by the Board of Directors of the Holding Company and reports of the statutory auditors of the subsidiary companies incorporated in India, none of the directors of the Group companies incorporated in India is disqualified as on 31st March, 2025 from being appointed as a director in terms of Section 164 (2) of the Act.
 - f. The modification relating to the maintenance of accounts and other matters connected therewith are

as stated in the paragraph 2(b) above on reporting under Section 143(3)(b) of the Act and paragraph 2(i)(vi) below on reporting under Rule 11(g) of the Companies (Audit and Auditors) Rules, 2014.

- g. With respect to the adequacy of the internal financial controls with reference to financial statements of the Holding Company and subsidiary companies incorporated in India and the operating effectiveness of such controls, refer to our separate report in "Annexure A".
- With respect to the matter to be included in the Auditor's Report under section 197(16) of the Act:
 - In our opinion and according to the information and explanations given to us and based on the report of the statutory auditors of the subsidiary Companies incorporated in India which were not audited by us, the remuneration paid during the current year by the Holding Company and its subsidiary companies to its directors is in accordance with the provisions of Section 197 of the Act.
- i. With respect to the other matters to be included in the Auditor's Report in accordance with Rule 11 of the Companies (Audit and Auditors) Rules, 2014, in our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the report of the other auditors on financial statements of the subsidiaries, as noted in the "Other Matter" paragraph:
 - The consolidated financial statements disclose the impact of pending litigations on the consolidated financial position of the Group– Refer Note 38 to the consolidated financial statements.
 - ii. Provisions have been made in the consolidated financial statements, as required under the applicable law or Ind AS, for material foreseeable losses, if any, on long-term contracts including derivative contracts. Refer Note 44 to the consolidated financial statements in respect of such items as it relates to the Group.
 - iii. There have been no delays in transferring amounts, to the Investor Education and Protection Fund by the Holding Company and its subsidiary companies incorporated in India during the year ended 31 March 2025.
 - iv. (a) The respective Managements of the Holding company and its subsidiaries have represented to us and other auditors of such subsidiaries respectively that, to the best of their knowledge and belief, no

- funds (which are material either individually or in the aggregate) have been advanced or loaned or invested (either from borrowed funds or share premium or any other sources or kind of funds) by the Holding Company or any of such subsidiaries to or in any other person or entity, including foreign entity ("Intermediaries"), with the understanding, whether recorded in writing or otherwise, that the Intermediary shall, whether, directly or indirectly lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Holding Company or any of such subsidiaries ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries;
- (b) The respective Managements of the Holding company and its subsidiaries have represented to us and other auditors of such subsidiaries respectively that, to the best of their knowledge and belief, no funds (which are material either individually or in the aggregate) have been received by the Holding company or any of such subsidiaries from any person or entity, including foreign entity ("Funding Parties"), with the understanding, whether recorded in writing or otherwise, that the Holding Company or any of such subsidiaries shall, whether, directly or indirectly, lend or invest in other persons or entities identified in any manner whatsoever by or on behalf of the Funding Party ("Ultimate Beneficiaries") or provide any guarantee, security or the like on behalf of the Ultimate Beneficiaries:
- (c) Based on the audit procedures that have been considered reasonable and appropriate in the circumstances performed by us on and on the consideration of the reports of the other auditors of its subsidiaries included in the consolidated financial statements, nothing has come to our or other auditors notice that has caused us or other auditors to believe that the representations under sub-clause (i) and (ii) of Rule 11(e), as provided under (a) and (b) above, contain any material misstatement.
- In our opinion and to the best of our information and according to the explanations given to us and based on the consideration of the auditors' report of the subsidiary companies (SRF Ltd.

and SRF Transnational Holdings Ltd.), the interim dividends declared and paid during the year and until the date of this audit report by the Holding Company and its subsidiary companies (SRF Ltd. and SRF Transnational Holdings Ltd.) are in compliance with Section 123 of the Act.

Based on our examination which included test checks and that performed by the respective auditors of the subsidiary companies which are incorporated in India and whose financial statements have been audited under the Act by other auditors, the Holding Company and its Indian subsidiary companies have used accounting softwares for maintaining its books of account, which have a feature of recording audit trail (edit log) facility and, except for the instances mentioned below (in relation to subsidiary SRF Ltd. in respect of accounting softwares used for maintaining general ledger and related records), the same has operated throughout the year for all relevant transactions recorded in the respective softwares. For the periods where audit trail (edit log) facility was enabled and operated for the respective accounting softwares, we did not come across, subject to other auditor's comment in subparagraph (c) below, any instance of the audit trail feature being tampered with. Further, except to the extent audit trail was not enabled for the previous year, the audit trail has been preserved by the Holding Company and its Indian subsidiary companies as per the statutory requirements for record retention.

Based on the independent auditor's report of SRF Ltd. (subsidiary of KAMA Holdings Ltd.), on its consolidated financial statements:

- a) For certain tables of (i) goods and service tax (GST) rate master, and (ii) approval records for changes to vendors and inventory masters, the feature of audit trail (edit log) facility was not enabled throughout the year.
- b) for (i) inventory tables and certain master tables, for the period from 1 April 2024 to 2 April 2024, and (ii) certain purchase and payables tables for different periods between 1 April 2024 to 15 January 2025, the feature of recording audit trail (edit log) facility was not enabled.
- for edit logs generated by these accounting softwares, only an authorized privileged

user had rights to make direct changes to the edit log. However, the feature of audit trail (edit log) facility for recording any such changes was not enabled throughout the year, and hence, we are unable to determine whether any direct changes to the edit logs were made during the year.

Annexure 'A' to Independent Auditors' Report

Report on the Internal Financial Controls under Clause (i) of Sub-section 3 of Section 143 of the Companies Act, 2013 ("the Act")

Opinion

Place: New Delhi

Date: 30th May, 2025

In conjunction with our audit of the consolidated financial statements of the KAMA Holdings Limited as of and for the year ended March 31, 2025, we have audited the internal financial controls with reference to consolidated financial statements of KAMA Holdings Limited (hereinafter referred to as "the Holding Company") and its subsidiary companies incorporated in India, as of that date.

In our opinion and based on the consideration of report of the other auditors on internal financial controls with reference to financial statements of subsidiary companies, as was audited by the other auditors, the Holding Company and such companies incorporated in India which are its subsidiary companies, have, in all material respects, adequate internal financial controls with reference to financial statements and such internal financial controls were operating effectively as at 31 March 2025, based on the internal financial controls with reference to financial statements criteria established by such companies considering the essential components of such internal controls stated in the Guidance Note on Audit of Internal Financial Controls Over Financial Reporting issued by the Institute of Chartered Accountants of India.

Management's Responsibility for Internal Financial Controls

The respective Company's management and Board of Directors are responsible for establishing and maintaining internal financial controls with reference to consolidated financial statements based on the criteria established by the

respective Company considering the essential components of internal control stated in the Guidance Note on Audit of Internal Financial Controls over Financial Reporting issued by the Institute of Chartered Accountants of India ('ICAI'). These responsibilities include the design, implementation and maintenance of adequate internal financial controls that were operating effectively for ensuring the orderly and efficient conduct of its business, including adherence to the respective company's policies, the safeguarding of its assets, the prevention and detection of frauds and errors, the accuracy and completeness of the accounting records, and the timely preparation of reliable financial information, as required under the Companies Act, 2013 (hereinafter referred to as "the Act").

Auditors' Responsibility

Our responsibility is to express an opinion on the internal financial controls with reference to consolidated financial statements based on our audit. We conducted our audit in accordance with the Guidance Note and the Standards on Auditing, prescribed under section 143(10) of the Act, to the extent applicable to an audit of internal financial controls with reference to consolidated financial statements. Those Standards and the Guidance Note require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether adequate internal financial controls with reference to consolidated financial statements were established and maintained and if such controls operated effectively in all material respects.

Our audit involves performing procedures to obtain audit evidence about the adequacy of the internal financial controls with reference to consolidated financial statements and their operating effectiveness. Our audit of internal financial controls with reference to consolidated financial statements included obtaining an understanding of internal financial controls with reference to consolidated financial statements, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of the internal controls based on the assessed risk. The procedures selected depend on the auditor's judgement, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error.

We believe that the audit evidence we have obtained and the audit evidence obtained by the other auditors of the relevant subsidiary companies in terms of their reports referred to in the Other Matters paragraph below, is sufficient and appropriate to provide a basis for our audit opinion on the internal financial controls with reference to consolidated financial statements.

Meaning of Internal Financial controls with Reference to Consolidated Financial Statements

A company's internal financial controls with reference to consolidated financial statements is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal financial controls with reference to consolidated financial statements includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorisations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorised acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Inherent Limitations of Internal Financial Controls with Reference to Consolidated Financial Statements

Because of the inherent limitations of internal financial controls over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may occur and not be detected. Also, projections of any evaluation of the internal financial controls over financial reporting to future periods are subject to the risk that the internal financial control over financial reporting may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Other Matter

Our report under Section 143(3)(i) of the Act on the adequacy and operating effectiveness of the internal financial controls over financial reporting with reference to the financial statements, in so far as it relates to the internal financial controls on the consolidated financial statements of its subsidiary (SRF Limited.) is based on the corresponding report of the auditor of such subsidiary. Our opinion is not modified in respect of this matter.

1 Corporate Information, Material Accounting Policies and Significant Accounting Judgements, Estimates and Assumptions

A Corporate Information

KAMA Holdings Limited ("the Company/KHL") is a public limited Company domiciled in India and incorporated under the provisions of the Companies Act, 1956. Equity shares of the Company are publicly traded in India on the Bombay Stock Exchange. The registered office of the Company is situated at The Galleria, DLF Mayur Vihar, Unit No. 236 and 237, Mayur Vihar Place, Mayur Vihar Phase I Extn, Delhi - 110091.

The Company is a core investment company while principal activities of its subsidiaries are manufacturing, purchase and sale of technical textiles, chemicals, packaging films, aluminium foils, other polymers, Investment activities, Real Estate, Education and allied activities.

The consolidated financial statements were authorised for issue in accordance with a resolution of the directors on May 30, 2025

B Material Accounting Policies

1 Basis of Preparation

The consolidated financial statements are prepared in accordance with Indian Accounting Standards (Ind AS) notified under the Section 133 of the 2013 Act read with the Companies (Indian Accounting Standards) Rules, 2015 as amended and other relevant provisions of the Act.

The consolidated financial statements have been prepared on an accrual basis and under the historical cost convention, except for the following assets and liabilities which have been measured at fair value:

- Derivative financial instruments
- Certain financial assets and liabilities measured at fair value (refer accounting policy regarding financial instruments)
- Defined benefit plans plan assets measured at fair value less present value of defined benefit obligation
- Share based payments

The functional currency of the Company is 'INR'. The functional currencies of Group companies are INR, USD, THB, ZAR, AED, Maldivian Rufiyaa and EURO. The financial statements are presented in INR and all values are rounded to the nearest lakhs, except when otherwise indicated.

The consolidated financial statements incorporate the financial statements of the holding group and its subsidiaries. Control is achieved when the group:

- · has power over the investee;
- · is exposed, or has rights, to variable returns from its involvement with the investee; and
- has the ability to use its power to affect its returns.

Consolidation of a subsidiary begins when the group obtains control over the subsidiary and ceases when the group loses control of the subsidiary. Specifically, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated statement of profit and loss from the date the group gains control until the date when the group ceases to control the subsidiary.

Profit or loss and each component of other comprehensive income are attributed to the owners of the group and to the non-controlling interests. Total comprehensive income of subsidiaries is attributed to the owners of the group and to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

Necessary adjustments are made in the consolidated financial statements of subsidiaries to bring their accounting policies in line with the Company's accounting policies if any.

All intragroup assets and liabilities, equity, income, expenses, unrealised profits or losses and cash flows relating to transactions between members of the Group are eliminated in full on consolidation.

The subsidiaries considered in the preparation of these consolidated financial statements are: -

The group owns 22.60% (Previous year – 22.60%) in Malanpur Captive Power Limited and the same has not been considered for the purposes of consolidation, since the group does not exercise significant influence over Malanpur Captive Power Limited.

The group owns 26.32% (Previous year – 26.32%) in Vaayu Renewable Energy (Tapti) Private Limited and the same has not been considered for the purposes of consolidation, since the group does not exercise significant influence over Vaayu Renewable Energy (Tapti) Private Limited.

The principal accounting policies are set out below.

2 Property, plant and equipment (PPE)

The cost of an item of property, plant and equipment shall be recognised as an asset if, and only if it is probable that future economic benefits associated with the item will flow to the Group and the cost of the item can be measured reliably.

Property, plant and equipment are stated at cost of acquisition or construction less accumulated depreciation and accumulated impairment losses, if any.

All items of property plant and equipment have been measured at fair value at the date of transition to Ind AS. The Group have opted such fair valuation as deemed cost at the transition date i.e. April 1, 2015.

Cost of an item of property, plant and equipment comprises its purchase price, including import duties and non-refundable purchase taxes, after deducting trade discounts and rebates, any directly attributable cost of bringing the item to its working condition for its intended use and estimated costs of dismantling and removing the item and restoring the site on which it is located. The cost of a self-constructed item of property, plant and equipment comprises the cost of materials and direct labour, any other costs directly attributable to bringing the item to working condition for its intended use, and estimated costs of dismantling and removing the item and restoring the site on which it is located.

Subsequent expenditure is capitalised only if it is probable that the future economic benefits associated with the expenditure will flow to the Group and the cost of the item can be measured reliably.

Excess of net sale proceeds of items produced during the test run over the cost of testing, if any, are not recognised in the profit or loss but deducted from the directly attributable costs of property, plant, and equipment.

If significant parts of an item of property, plant and equipment have different useful lives, then they are accounted for as separate items of property, plant and equipment and depreciated accordingly.

Assets are classified to the appropriate categories of property, plant and equipment when completed and ready for intended use.

Capital Work in Progress: Project under which assets are not yet ready for their intended use are carried at cost comprising direct cost of material and labour, related incidental expenses and attributable interest.

Spare parts are capitalized when they meet the definition of PPE, i.e., when the group intends to use these for more than a period of 12 months.

3 Investment Property

Investment properties are properties held to earn rentals or for capital appreciation, or both. Investment properties are measured initially at cost of acquisition, including transaction costs. On transition to IND AS, the Company has elected to measure all of its investment properties at the previous GAAP carrying value (deemed cost).

Subsequent costs are included in the asset's carrying amount or recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Company. All other repair and maintenance costs are recognised in the statement of Profit & Loss as incurred.

Investment properties are subsequently measured at cost less accumulated depreciation and accumulated impairment losses, if any. Depreciation on investment properties is provided on straight line basis over the useful life specified in schedule II of the Companies Act, 2013. The useful life has been considered as 60 years for the depreciation of the Investment Properties.

The residual values, useful lives and method of depreciation are reviewed at the end of the each financial year and adjusted prospectively.

Though the Company measures investment property using cost based measurement, the fair value of investment property is disclosed in the notes.

Investment properties are de-recognised either when they have been disposed of or when they are permanently withdrawn from use and no future economic benefit is expected from their disposal. The difference between the net disposal proceeds and the carrying amount of the asset is recognised in the Statement of Profit & Loss in the period of de-recognition.

4 Depreciation

Depreciable amount for assets is the cost of an asset, or other amount substituted for cost, less its estimated residual value.

Depreciation has been provided on the cost of assets less their residual values on straight line method on the basis of estimated useful life of assets determined by the Group which are different from the useful life as prescribed in Schedule II of the 2013 Act. The estimated useful life of the assets have been assessed based on technical advice, taking into account the nature of the asset, the estimated usage of the asset, the operating conditions of the asset, past history of replacement, anticipated technological changes, manufacturers warranties and maintenance support, etc. and are as under:

Management's estimate of useful life

Roads 40-50 years
Buildings (including temporary stucture) 5-60 years
Plant and equipment 2-40 years
Furniture and fixtures 3-20 years
Office equipment 3-20 years
Vehicles 4-5 years
Computers & others 4 years

Freehold land is not depreciated.

Depreciation is calculated on a pro rata basis except, assets costing upto Rs. 5,000 each, which are fully depreciated in the year of purchase.

An item of property, plant and equipment or any significant part initially recognised of such item of property plant and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Any gain or loss arising on derecognition of the asset (calculated as the difference between the net disposal proceeds and the carrying amount of the asset) is included in the consolidated statement of profit and loss.

The estimated useful lives and methods of depreciation of property, plant and equipment are reviewed at each financial year end and adjusted prospectively, if appropriate.

5 Other Intangible Assets

Intangible assets acquired separately are measured on initial recognition at cost.

Following initial recognition, intangible assets are carried at cost less any accumulated amortisation and accumulated impairment losses, if any.

Internally generated intangibles, excluding capitalised development costs, are not capitalised and the related expenditure is reflected in profit or loss in the period in which the expenditure is incurred.

Subsequent Expenditure is capitalised only when it increases the future economic benefits embodied in the specific asset to which it relates and the cost of the asset can be measured reliably.

Intangible assets with finite lives are amortised using the straight line method over the useful economic life and assessed for impairment whenever there is an indication that the intangible asset may be impaired. The useful lives considered are as follows:

Trademarks / Brand 10-30 years
Technical Knowhow 30-40 years
Software 3-5 years
Other intangibles 2.5-12 years

The group has elected to continue with the carrying value of all of its intangibles assets recognised as on transition date measured as per the previous GAAP and use that carrying value as its deemed cost as of transition date.

The amortisation period and the amortisation method for an intangible asset with a finite useful life are reviewed at least at the end of each reporting period. Changes in the expected useful life or the expected pattern of consumption of future economic benefits embodied in the asset are considered to modify the amortisation period or method, as appropriate, and are treated as changes in accounting estimates. The amortisation expense on intangible assets with finite lives is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset.

An intangible asset is derecognised on disposal or when no future economic benefit are expected from use or disposal. Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognised in the statement of profit or loss when the asset is derecognised.

6 Research and development expenditure

Expenditure on research and development of products is included under the natural heads of expenditure in the year in which it is incurred except which relate to development activities whereby research findings are applied to a plan or design for the production of new or substantially improved products and processes.

Such development costs are capitalised if they can be reliably measured, the product or process is technically and commercially feasible and the Group has sufficient resources to complete the development and to use or sell the asset.

Following initial recognition of the development expenditure as an asset, the asset is carried at cost less any accumulated amortisation and accumulated impairment losses, if any. Amortisation of the asset begins when development is complete and the asset is available for use. It is amortised over the period of expected future benefit. Amortisation expense is recognised in the statement of profit and loss unless such expenditure forms part of carrying value of another asset. During the period of development, the asset is tested for impairment annually.

7 Impairment of tangible and intangible assets other than goodwill

The Group assesses, at each reporting date, whether there is an indication that an asset may be impaired. If any indication exists, or when annual impairment testing for an asset is required, the group estimates the asset's recoverable amount. An asset's recoverable amount is the higher of an asset's or cash-generating unit's (CGU) fair value less costs of disposal and its value in use.

Recoverable amount is determined for an individual asset, unless the asset does not generate cash inflows that are largely independent of those from other assets or groups of assets.

Impairment loss is recognised When the carrying amount of an asset or CGU exceeds its recoverable amount. In such cases, the asset is considered impaired and is written down to its recoverable amount.

In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset. In determining fair value less costs of disposal, recent market transactions are taken into account. If no such transactions can be identified, an appropriate valuation model is used. These calculations are corroborated by valuation multiples or other available fair value indicators.

For assets excluding goodwill, an assessment is made at each reporting date to determine whether there is an indication that previously recognised impairment losses no longer exist or have decreased. If such indication exists, the group estimates the asset's or CGU's recoverable amount. A previously recognised impairment loss is reversed only if there has been a change in the assumptions used to determine the asset's recoverable amount since the last impairment loss was recognised. The reversal is limited so that the carrying amount of the asset does not exceed its recoverable amount, nor exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognised for the asset in prior years.

8 Leasing

At inception of a contract, the Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period of time in exchange for consideration. To assess whether a contract conveys the right to control the use of an identified asset, the Group assess whether:

- the contract involves the use of an identified asset this may be specified explicitly or implicitly and should be
 physically distinct or represent substantially all of the capacity of a physically distinct asset. If the supplier has a
 substantive substitution right, then the asset is not identified;
- the Group has the right to obtain substantially all of the economic benefits from use of the asset through the period of use; and
- the Group has the right to direct the use of the asset. The Group has this right when it has the decision- making rights that are most relevant to changing how and for what purpose the asset is used. In rare cases, where the decision about how and for what purpose the asset is used is predetermined, the Group has the right to direct the use of the asset if either:
 - the Group has the right to operate the asset; or
 - the Group designed the asset in a way that predetermines how and for what purpose it will be used.

The group reassesses whether a contract is, or contains, a lease only if the terms and conditions of the contract are changed.

At inception or on reassessment of a contract that contains a lease component, the Group allocates the consideration in the contract to each lease component on the basis of their relative stand-alone prices.

Group as lessee

The Group accounts for assets taken under lease arrangement in the following manner:

The Group recognises a right-of-use asset and a lease liability at the lease commencement date. The right of use asset is initially measured at cost, which comprises the initial amount of the lease liability adjusted for any lease payments made at or before the commencement date, plus any initial direct costs incurred and an estimate of costs to dismantle and remove the underlying asset or to restore the underlying asset or the site on which it is located, less any lease incentive received.

The right of use asset is subsequently depreciated using the straight line method from the commencement date to the end of the lease term. The estimated useful lives of right-of-use assets are determined on the basis of remaining lease term. In addition, the right-of-use asset is periodically reduced by impairment losses, if any, and adjusted for certain remeasurements of the lease liability.

The lease liability is initially measured at the present value of the lease payments that are not paid at the commencement date, discounted using the interest rate implicit in the lease or, if that rate cannot be readily determined, the Group's incremental borrowing rate. Generally, the Group uses its incremental borrowing rate as the discount rate. The Group determines its incremental borrowing rate by obtaining interest rates from various external financing sources and makes certain adjustments to reflect the terms of the lease and type of the asset leased.

Lease payments included in the measurement of the lease liability comprise the fixed payments, including in-substance fixed payments and variable lease payments that depend on an index or a rate, initially measured using the index or rate as at the commencement date.

The lease liability is measured at amortised cost using the effective interest method. It is remeasured when there is a change in future lease payments arising from a change in an index or rate, if there is a change in Group's estimate of the amount expected to be payable under a residual value guarantee, or if the Group changes its assessment of whether it will exercise a purchase, extension or termination option.

When the lease liability is remeasured in this way, a corresponding adjustment is made to the carrying amount of the right-of-use asset, or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

Short-term leases and leases of low-value assets

The Group has elected not to recognise right-of use assets and lease liabilities for short term leases that have a lease term of 12 months or less and leases of low value assets. The Group recognises the lease payments associated with these leases as an expense on a straight- line basis over the lease term.

Group as lessor

Leases in which the Company does not transfer substantially all the risks and rewards of the ownership of an asset are classified as operating leases. Rental income from operating lease is recognised on a straight line basis over the term of the lease except where scheduled increase in rent compensates the Company with expected inflationary costs. Initial direct costs incurred in negotiating and arranging an operating lease are added to the carrying amount of the leased asset and recognised over the lease term on the same basis as rental income.

Leases are classified as finance leases when substantially all of the risks and rewards of ownership transfer from the Company to the lessee. Amount due from lessee under finance leases are recorded as receivables at the Company's net investment in the leases. Finance lease income is allocated to accounting period so as to reflect a constant periodical rate of return on the net investment outstanding in respect of the lease.

9 Borrowing costs

Borrowing costs consist of interest and other costs that an entity incurs in connection with the borrowing of funds. Borrowing cost also includes exchange differences to the extent regarded as an adjustment to the borrowing costs.

Borrowing costs directly attributable to the acquisition, construction or production of an asset that necessarily takes a substantial period of time to get ready for its intended use or sale are capitalised as part of the cost of the asset. Borrowing costs incurred for the period from commencement of activities relating to construction/development of the qualifying asset up to the date of capitalisation of such asset are added to the cost of the asset. All other borrowing costs are expensed in the period in which they occur.

In case of a specific borrowing taken for the purpose of acquisition, construction or production of a qualifying asset, the borrowing costs capitalised shall be the actual borrowing costs incurred during the period less any interest income earned on temporary investment of specific borrowing pending expenditure on qualifying asset.

In case funds are borrowed generally and such funds are used for the purpose of acquisition, construction or production of a qualifying asset, the borrowing costs capitalised are calculated by applying the weighted average capitalisation rate on general borrowings outstanding during the period, to the expenditures incurred on the qualifying asset.

If any specific borrowing remains outstanding after the related asset is ready for its intended use, that borrowing is considered part of the funds that are borrowed generally for calculating the capitalisation rate.

10 Foreign Currencies

Transaction and balances

Transactions in foreign currencies are recorded on initial recognition at the exchange rate prevailing on the date of the transaction.

- (i) Monetary assets and liabilities denominated in foreign currency remaining unsettled at the end of the year, are translated at the closing rates prevailing on the Balance Sheet date. Non-monetary items which are carried in terms of historical cost denominated in foreign currency are reported using the exchange rate at the date of transaction. Any gains or losses arising due to differences in exchange rates at the time of translation or settlement are accounted for in the Statement of Profit and Loss either under the head foreign exchange fluctuation or interest cost, as the case may be, except those relating to exchange differences arising from cash flow hedges to the extent that the hedges are effective and those covered below.
- (ii) Exchange differences pertaining to long term foreign currency loans obtained or re-financed on or before March 31, 2016.
 - Exchange differences on long-term foreign currency monetary items relating to acquisition of depreciable assets are adjusted to the carrying cost of the assets and depreciated over the balance useful life of the assets.
- (iii) Exchange differences pertaining to long term foreign currency loans obtained or re-financed on or after April 1, 2016.

The exchange differences pertaining to long term foreign currency loans obtained or re-financed on or after April 1, 2016 is treated in accordance with Ind AS 21/ Ind AS 109. Refer point (i) above.

Exchange difference on translating financial statements of foreign operations

On consolidation, the assets and liabilities of foreign operations are translated into Rupees at the rate of exchange prevailing at the reporting date and their statements of profit or loss are translated at exchange rates prevailing at the dates of the transactions. For practical reasons, the group uses an average rate to translate income and expense items, if the average rate approximates the exchange rates at the dates of the transactions. The exchange differences arising on translation for consolidation are recognised in OCI. On disposal of a foreign operation, the component of OCI relating to that particular foreign operation is recognised in profit or loss.

11 Inventories

Inventories are valued at cost or net realisable value, whichever is lower. The basis of determining the cost for various categories of inventory are as follows:

- (a) Raw materials, packing material and stores and spares including fuel Cost includes cost of purchase and other costs incurred in bringing the inventories to their present location and condition. Cost is determined on weighted average basis. The aforesaid items are valued below cost if the finished products in which they are to be incorporated are expected to be sold at a loss.
- (b) Traded goods, Stock in progress and finished goods- Direct cost plus appropriate share of overheads base on normal operating capacity.
- (c) By products At estimated realisable value

Net realisable value is the estimated selling price in the ordinary course of business, less estimated costs of completion and the estimated costs necessary to make the sale. The net realisable value of work-in-progress is determined with reference to the selling prices of related finished goods. Raw materials, components and other supplies held for use in the production of finished products are not written down below cost except in cases when a decline in the price of materials indicates that the cost of the finished products shall exceed the net realisable value.

The comparison of cost and net realisable value is made on an item-by-Item basis.

12 Provisions, contingent liabilities and contingent assets

Provisions

The group recognised a provision when there is a present obligation (legal or constructive) as a result of past events and it is more likely than not that an outflow of resources would be required to settle the obligation and a reliable estimate can be made.

When the group expects some or all of a provision to be reimbursed, for example, under an insurance contract, the reimbursement is recognised as a separate asset, but only when the reimbursement is virtually certain.

The expense relating to a provision is presented in the statement of profit and loss net of any reimbursement.

If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Contingent liabilities

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the group or a present obligation that is not recognised because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognised because it cannot be measured reliably. The group does not recognize a contingent liability but discloses its existence in the financial statements unless the possibility of an outflow of resources embodying economic benefits is remote. Contingent liabilities and commitments are reviewed by the management at each balance sheet date.

Contingent assets

Contingent assets are not recognised in the consolidated financial statements. However, contingent assets are assessed continually and if it is virtually certain that an inflow of economic benefits will arise, the asset and related income are recognised in the period in which the change occurs.

13 Revenue recognition

Revenue is measured at the fair value of consideration received or receivable. Revenue is recognised only when it can be reliably measured and it is probable that future economic benefits will flow to the Group.

- a) Dividend income from investments is recognised when the shareholder's right to receive payment has been established (provided that it is probable that the economic benefits will flow to the group and the amount of income can be measured reliably).
- b) Interest income is recognised when it is probable that the economic benefits will flow to the group using the effective interest rate method and the amount of income can be measured reliably. Interest income is accrued on time basis, by reference to the principal outstanding.

The 'effective interest rate' is the rate that exactly discounts estimated future cash payments or receipts through the expected life of the financial instrument to the gross carrying amount of the financial asset; or the amortised cost of the financial liability. Interest income is accrued on time basis, by reference to the principal outstanding.

c) Sale of goods and services:

Revenue from sale of products is recognised upon transfer of control of products to customers at the time of shipment to or receipt of goods by the customers as per agreed terms.

Revenues towards satisfaction of a performance obligation are measured based on the transaction price (net of variable consideration), which is the consideration, net of tax collected from customers and remitted to government authorities such as sales tax/value added tax and goods and services tax and applicable discounts and allowances.

Excess of revenue earned over billings on contracts is recognised as unbilled revenue. Unbilled revenue is classified as Trade receivables when there is unconditional right to receive cash, and only passage of time is required, as per contractual terms. Advance from customers ("contract liability") is recognised when the group has received consideration from the customer before it delivers the goods.

Other operating revenue includes revenue from various ancillary revenue generating activities like Scrap sales and Material handling income which are recognised at a point in time, in accordance with the terms of the relevant agreements, as and when material is shipped, or services are performed.

- (d) Course fees and Royalty income is recognized over the duration of the course and as per agreed terms.
- (e) Franchise fees is recognized as per the agreed terms of the agreement.
- (f) Revenue from other services is recognised as and when such services are completed/performed.

14 Taxation

Income tax expense represents the sum of the current tax and deferred tax.

a) Current tax

Current income tax assets and liabilities are measured at the best estimate of amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date.

Current income tax relating to items recognised outside profit or loss is recognised outside profit or loss account i.e. in Other comprehensive income or equity.

Current tax assets and liabilities are offset only if there is a legally enforceable right to set off the recognised amounts, and it is intended to realise the asset and settle the liability on a net basis or simultaneously.

b) Deferred tax

Deferred tax is provided on temporary differences between the tax bases of assets and liabilities and their carrying amounts at the reporting date.

Deferred tax assets and liabilities are measured using substantively enacted tax rates expected to apply to taxable income in the years in which the temporary differences are expected to be received or settled.

Deferred tax assets and liabilities are offset if such items relate to taxes on income levied by the same governing tax laws and the group has a legally enforceable right for such set off.

The carrying amount of deferred tax assets is reviewed at each reporting date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilised. Unrecognised deferred tax assets are re-assessed at each reporting date and are recognised to the extent that it has become probable that future taxable profits will allow the deferred tax asset to be recovered. Deferred tax assets are recognised for all deductible temporary differences and unused tax losses only if it is probable that future taxable amounts will be available to utilise those temporary differences and losses.

Deferred tax relating to items recognised outside profit or loss is recognised in other comprehensive income or in equity.

Deferred tax assets/liabilities are not recognised for below mentioned temporary differences:

- (i) At the time of initial recognition of goodwill;
- (ii) Initial recognition of assets or liabilities (other than in a business combination) at the time of the transaction,(a) affects neither the accounting profit nor taxable profit or loss and (b) does not give rise to equal taxable and deductible temporary differences;
- (iii) In respect of taxable temporary differences associated with investments in subsidiaries, associates and interests in joint ventures, when the timing of the reversal of the temporary differences can be controlled and it is probable that the temporary differences will not reverse in the foreseeable future.

The group considers whether it is probable that a taxation authority will accept an uncertain tax treatment. If the group concludes that it is probable that the taxation authority will accept an uncertain tax treatment, the group determines the taxable profit (tax loss), tax bases, unused tax losses, unused tax credits or tax rates consistently with the tax treatment used or planned to be used in its income tax filings. However, if the group concludes that it is not probable that the taxation authority will accept an uncertain tax treatment, the group reflects the effect of uncertainty in determining the related taxable profit (tax loss), tax bases, unused tax losses, unused tax credits or tax rates.

15 Government grants

Government grants are recognised where there is reasonable assurance that the grant will be received and all attached conditions will be complied with.

A government grant that becomes receivable as compensation for expenses or losses is recognised in profit or loss on a systematic basis over the periods in which the group recognizes as expenses the related costs for which the grants are intended to compensate, unless the conditions for receiving the grant are met after the related expenses have been recognised. In this case the grant is recognised when it becomes receivable.

Government grants related to assets are presented in the consolidated balance sheet at fair value as deferred income and are recognised in profit or loss on a systematic basis over the expected useful life of the related assets.

Revenue from export benefits arising from duty drawback scheme, remission of duties and taxes on exported product scheme are recognized on export of goods in accordance with their respective underlying scheme at fair value of consideration received or receivable. The benefit accrued under the above scheme is included under the head "Revenue from Operations" under 'Export and other incentives'.

16 Employee benefits

Short term employee benefits

Wages and salaries including non monetary benefits that are expected to be settled within the operating cycle after the end of the period in which the related services are rendered are measured at the undiscounted amount expected to be paid. A liability is recognised for the amount expected to be paid under short-term cash bonus, if the Group has a present legal or constructive obligation to pay this amount as a result of past service provided by the employee and the obligation can be estimated reliably.

Defined contribution plans

Provident fund administered through Regional Provident Fund Commissioner, Superannuation Fund, National pension scheme and Employees' State Insurance Corporation are defined contribution schemes. Contributions to such schemes are charged to the statement of profit and loss in the year when employees have rendered services entitling them to the contributions. The group has no obligation, other than the contribution payable to such schemes.

Defined benefit plans

The group has defined benefit plan such as gratuity, provident fund for certain category of employees administered through a recognised provident fund trust and legal severance plans.

Provision for gratuity, provident fund for certain category of employees administered through a recognised provident fund trust and legal severance plans are determined on an actuarial basis at the end of the year and charged to consolidated statement of profit and loss, other than remeasurements. The cost of providing these benefits is determined using the projected unit credit method.

Remeasurements, comprising of actuarial gains and losses and the effect of the asset ceiling, (excluding amounts included in net interest on the net defined benefit liability and return on plan assets), are recognised immediately in the balance sheet with a corresponding debit or credit to retained earnings through other comprehensive income in the period in which they occur. Re-measurements are not reclassified to consolidated statement of profit and loss in subsequent periods.

Other long term employee benefits

The group also has other long term benefits plan such as compensated absences. Provision for compensated absences are determined on an actuarial basis at the end of the year and charged to consolidated Statement of Profit and Loss. The cost of providing these benefits is determined using the projected unit credit method.

Share based payments

Equity settled share based payments to employees under SRF Long Term Share Based Incentive Plan (SRF LTIP) are measured at the fair value (which is the market price less exercise price) of the equity instruments on the grant date. This compensation cost relating to employee stock purchase scheme is amortised over the remaining tenure over which the employees renders their service on a straight line basis.

17 Earnings per share

Basic earnings per share is calculated by dividing the net profit or loss for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year.

For the purpose of calculating diluted earnings per share, the net profit or loss for the period attributable to equity shareholders and the weighted average number of shares outstanding during the period is adjusted for the effects of all dilutive potential equity shares.

18 Cash and cash equivalents

Cash and cash equivalent in the balance sheet comprise cash at banks and on hand and short-term deposits with an original maturity of three months or less, which are subject to an insignificant risk of changes in value.

19 Financial instruments

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

Initial recognition and measurement

Trade receivables and debt securities issued are initially recognised when they are originated. All other financial assets and financial liabilities are initially recognised when the Group becomes a party to the contractual provisions of the instrument.

A financial asset (unless it is a trade receivable without a significant financing component) or financial liability is initially measured at fair value plus or minus, for an item not at FVTPL, transaction costs that are directly attributable to its acquisition or issue. A trade receivable without a significant financing component is initially measured at the transaction price.

A) Financial assets

Classification and Subsequent measurement

For purposes of subsequent measurement, financial assets of the group are classified in three categories:

- a) At amortised cost
- b) At fair value through profit and loss (FVTPL)
- c) At fair value through other comprehensive income (FVTOCI).

Financial assets are not reclassified subsequent to their initial recognition unless the Group changes its business model for managing financial assets, in which case all affected financial assets are reclassified on the first day of the first reporting period following the change in the business model.

Financial asset is measured at amortised cost if both the following conditions are met:

- The asset is held within a business model whose objective is to hold assets for collecting contractual cash flows, and
- b) Contractual terms of the asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding.

After initial measurement, such financial assets are subsequently measured at amortised cost using the effective interest rate (EIR) method. Amortised cost is calculated by taking into account any discount or premium on acquisition and fees or costs that are an integral part of the EIR. The EIR amortisation is included in other income in the consolidated statement of profit and loss. The losses arising from impairment are recognised in the statement of profit and loss. This category generally applies to trade and other receivables.

A debt investment is measured at FVOCI if it meets both of the following conditions and is not designated as at FVTPL:

- it is held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets; and
- its contractual terms give rise on specified dates to cash flows that are solely payments of principal and interest on the principal amount outstanding.

Financial assets not classified as measured at amortised cost or FVOCI as are measured at FVTPL. Financial assets included within the FVTPL category are measured at fair value with all changes recognised in the statement of profit and loss.

Equity Investments

All equity investments in the scope of Ind AS 109 are measured at fair value. Equity instruments which are held for trading are measured at fair value through profit and loss.

For all other equity instruments, the group may make an irrevocable election to present subsequent changes in the fair value in other comprehensive income .

The group makes such election on an instrument by instrument basis. The classification is made on initial recognition and is irrevocable.

If the group decides to classify an equity instrument as at FVTOCI, then all fair value changes on the instrument, excluding dividends, are recognised in other comprehensive income. This cumulative gain or loss is not reclassified to statement of profit and loss on disposal of such instruments.

Derecognition

A financial asset (or, where applicable, a part of a financial asset) is primarily derecognised (i.e. removed from the balance sheet) when:

- a) The rights to receive cash flows from the asset have expired, or
- b) The group has transferred its rights to receive cash flows from the asset or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement; and either (i) the group has transferred substantially all the risks and rewards of the asset, or (ii) the group has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the group has transferred its rights to receive cash flows from an asset or has entered into a pass-through arrangement, it evaluates if and to what extent it has retained the risks and rewards of ownership. When it has neither transferred nor retained substantially all of the risks and rewards of the asset, nor transferred control of the asset, the group continues to recognise the transferred asset to the extent of the group's continuing involvement. In that case, the group also recognizes an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the group has retained. Any gain or loss on derecognition is recognised in profit or loss.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration that the group could be required to repay.

When the group has retained substantially all the risks and rewards of ownership of the transferred asset, the group continue to recognise the transferred asset in its entirety and recognise a financial liability for the consideration received.

Impairment of financial assets

The group recognizes loss allowance using the expected credit loss (ECL) model for the financial assets which are not fair valued through profit or loss. Loss allowance for trade receivables with no significant financing component is measured at an amount equal to lifetime ECL. For all financial assets with contractual cash flows other than trade receivable, ECLs are measured at an amount equal to the 12-month ECL, unless there has been a significant increase in credit risk from initial recognition in which case those are measured at lifetime ECL. The amount of ECL (or reversal) that is required to adjust the loss allowance at the reporting date is recognised as an impairment gain or loss in the Statement of Profit and Loss.

When determining whether the credit risk of a financial asset has increased significantly since initial recognition and when estimating ECLs, the Group considers reasonable and supportable information that is relevant and available without undue cost or effort. This includes both quantitative and qualitative information and analysis, based on the Group's historical experience and informed credit assessment, that includes forward-looking information.

The Group considers a financial asset to be in default when the asset is unlikely to be realised in full.

Credit-impaired financial assets: At each reporting date, the Group assesses whether financial assets carried at amortised cost and debt securities at FVOCI are credit-impaired. A financial asset is 'credit-impaired' when one or more events that have a detrimental impact on the estimated future cash flows of the financial asset have occurred.

Evidence that a financial asset is credit-impaired includes the following observable data:

- · significant financial difficulty of the debtor;
- · a breach of contract such as a default;
- it is probable that the debtor will enter bankruptcy or other financial reorganisation.

Based on the impairment methodology, the company classifies its loans into following categories:

Stage 1: 12-months ECL

For exposures where there has not been a significant increase in credit risk since initial recognition and that are not credit impaired upon origination, the portion of the lifetime ECL associated with the probability of default events occurring within the next 12 months is recognised.

Stage 2: Lifetime ECL - not credit impaired

For exposures where there has been a significant increase in credit risk since initial recognition but are not credit impaired, a lifetime ECL (i.e. reflecting the remaining lifetime of the financial asset) is recognised.

Stage 3: Lifetime ECL - credit impaired

Exposures are assessed as credit impaired when one or more events that have a detrimental impact on the estimated future cash flows of that asset have occurred. For exposures that have become credit impaired, a lifetime ECL is recognised and interest revenue is calculated by applying the effective interest rate to the amortised cost (net of provision) rather than the gross carrying amount.

Interms of the requirement as per RBI notification no. RBI/2019-20/170 DOR (NBFC). CC.PD.No.109/22.10.106/2019-20 dated 13th March, 2020 on Implementation of Indian Accounting Standards, Non-Banking Financial Companies (NBFCs) are required to create an impairment reserve for any shortfall in impairment allowances under Ind AS 109 and Income Recognition, Asset Classification and Provisioning (IRACP) norms (including provision on standard assets). The impairment allowances under Ind AS 109 made by the company exceeds the total provision required under IRACP (including standard asset provisioning), as at 31st March, 2025 and accordingly, no amount is required to be transferred to impairment reserve.

Presentation of allowance for ECL in the balance sheet:

Loss allowances for financial assets measured at amortised cost are deducted from the gross carrying amount of the assets.

Write-off

The gross carrying amount of a financial asset is written off when the Group has no reasonable expectations of recovering a financial asset in its entirety or a portion thereof. However financial assets that are written off could still be subject to enforcement activities in order to comply with the Group's procedures for recovery of amounts due.

B) Financial liabilities and Equity instruments

Initial recognition and measurement

All financial liabilities are recognised initially at fair value, net of directly attributable transaction costs, if any.

The group's financial liabilities include borrowings and trade and other payables including derivative financial instruments.

Subsequent measurement

Borrowings

Borrowings are subsequently measured at amortised cost. Any differences between the proceeds(net of transaction cost) and the redemption/repayment amount is recognised in profit and loss over the period of the borrowings using the Effective interest rate method.

Trade and other payables

Trade and other payables represent the liabilities for goods and services provided to the group prior to the end of the financial year which are unpaid.

Offsetting of financial instruments

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated balance sheet if there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, to realise the assets and settle the liabilities simultaneously.

Derecognition

A financial liability is derecognised when the obligation under the liability is discharged or cancelled or expires.

When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference in the respective carrying amounts is recognised in the consolidated statement of profit or loss.

Equity Instruments

Equity Instruments are any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

Debt or equity instruments issued by the group are classified as either financial liability or as equity in accordance with the substance of contractual arrangements and the definitions of a financial liabilities and an equity instruments.

20 Derivative and Non- Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement

The group uses derivative financial instruments (such as forward currency contracts, interest rate swaps and full currency swaps) or non derivative financial assets/liabilities to hedge its foreign currency risks and interest rate risks. The group has opted for "Hedge Accounting" for all its derivative as well as non-derivative financial instrument used for hedging. Accordingly, at the inception of the hedge the group formally designates a hedge relationship between the 'hedging instrument' and 'hedged item' which determine the initial recognition of the financial instrument as Fair Value Hedge or Cashflow hedge. The documentation includes the group's risk management objective and strategy for undertaking hedge, the hedging/ economic relationship, the hedged item or transaction, the nature of the risk being hedged and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. The Group determines the existence of an economic relationship between the hedging instrument and hedged item based on the currency/reference interest rates, contract amount and timing of their respective cash flows. The Group assesses whether the derivative designated in each hedging relationship is expected to be and has been effective in offsetting changes in cash flows of the hedged item using the hypothetical derivative method. In these hedge relationships, the main expected sources of ineffectiveness are:

a) the effect of the counterparties' and the Group's own credit risk on the fair value of the forward foreign exchange contracts or Swaps, which is not reflected in the change in the fair value of the hedged cash flows attributable to the change in exchange rates or interest rates and

b) changes in the timing of the hedged transactions.

Hedges entered into by group are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed on an ongoing basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated. These financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently re-measured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in the fair value of derivatives are taken directly to profit or loss, except for the effective portion of cash flow hedges, which is recognised in OCI and later reclassified to profit and loss when the hedge item affects profit and loss.

For the purpose of hedge accounting, hedges are classified as:

- a) Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability.
- b) Cash flow hedges when hedging the exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment.

Hedges that meet the strict criteria for hedge accounting are accounted for, as described below:

Fair value hedges

The change in the fair value of a hedging instrument is recognised in the consolidated statement of profit and loss. The change in the fair value of the hedged item attributable to the risk hedged is recorded as part of the carrying value of the hedged item and is also recognised in the statement of profit and loss.

If the hedged item is derecognised, the unamortised fair value is recognised immediately in profit or loss. When an unrecognised firm commitment is designated as a hedged item, the subsequent cumulative change in the fair value of the firm commitment attributable to the hedged risk is recognised as an asset or liability with a corresponding gain or loss recognised in consolidated profit and loss.

Cash flow hedges

The effective portion of the gain or loss on the hedging instrument is recognised in other comprehensive income in the cash flow hedge reserve, while any ineffective portion is recognised immediately in the consolidated statement of profit and loss.

The Group uses forward currency contracts as hedges of its exposure to foreign currency risk in forecast transactions and firm commitments. The ineffective portion relating to foreign currency contracts is recognised in the consolidated statement of profit and loss. In some cases, the group separates the premium element and the spot element of a forward contract and designates only the change in fair value of the spot element of forward exchange contracts as the hedging instrument in cash flow hedging relationships. In such cases, the changes in the fair value of the premium element of the forward contract or the foreign currency basis spread of the financial instrument is accumulated in a separate component of equity as 'cost of hedging'. The changes in the fair value of such premium element or foreign currency basis spread are reclassified to profit or loss as a reclassification adjustment on a straight-line basis over the period of the forward contract or the financial instrument.

The Group also designates certain non derivative financial liabilities, such as foreign currency borrowings from banks, as hedging instruments for the hedge of foreign currency risk associated with highly probable transactions and, accordingly, applies cash flow hedge accounting for such relationships.

Amounts recognised as other comprehensive income are transferred to profit or loss when the hedged transaction affects profit or loss, such as when the hedged financial income or financial expense is recognised or when a forecast transaction occurs.

If the hedging instrument expires or is sold, terminated or exercised without replacement or rollover (as part of the hedging strategy), or if its designation as a hedge is revoked, or when the hedge no longer meets the criteria for hedge accounting, the hedge accounting will be discontinued prospectively. Any cumulative gain or loss previously recognised in other comprehensive income remains separately in other equity if the forecast transaction or the foreign currency firm commitment is expected to occur else the amount shall be immediately reclassified from the cash flow hedge reserve to profit or loss as a reclassification adjustment.

21 Fair value measurement

The group measures some of its financial instruments at fair value at each balance sheet date.

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- a) In the principal market for the asset or liability, or
- b) In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible by the group. The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest. A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use. The group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs. All assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- a) Level 1 Quoted (unadjusted) market prices in active markets for identical assets or liabilities.
- b) Level 2 inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- c) Level 3 inputs for the asset or liability that are not based on observable market data (unobservable inputs).

For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, the group determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

For the purpose of fair value disclosures, the group has determined classes of assets and liabilities on the basis of the nature, characteristics and risks of the asset or liability and the level of the fair value hierarchy as explained above.

22 Segment reporting

Based on "Management Approach" as defined in Ind AS 108 -Operating Segments, the Chief Operating Decision Maker evaluates the group's performance and allocates the resources based on an analysis of various performance indicators by business segments. Inter segment sales and transfers are reflected at market prices.

Unallocable items includes general corporate income and expense items which are not allocated to any business segment.

Segment Policies:

The group prepares its segment information in conformity with the accounting policies adopted for preparing and presenting the consolidated financial statements of the group as a whole. Common allocable costs are allocated to each segment on an appropriate basis.

23 Dividend

The group recognises a liability to make cash distributions to equity holders when the distribution is authorised and the distribution is no longer at the discretion of the group. As per the corporate laws in India, a distribution is authorised when it is approved by the shareholders. A corresponding amount is recognised directly in equity.

24 Ministry of Corporate Affairs ("MCA") notifies new standards or amendments to the existing standards under Companies (Indian Accounting Standards) Rules as issued from time to time. On May 7, 2025, MCA issued the Companies (Indian Accounting Standards) Amendment Rules, 2025, which made certain amendments to Ind AS 21 The Effects of Changes in Foreign Exchange Rates, effective from 1 April 2025. These amendments define currency exchangeability, provide guidance on estimating spot exchange rates when a currency is not exchangeable and include related disclosure requirements. The Company does not expect this amendment to have any significant impact in its financial statements.

C Significant Accounting Judgements, Estimates and Assumptions

The preparation of consolidated financial statements requires management to make judgments, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Judgements, estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognised in the period in which the estimates are revised and in any future periods affected. In particular, information about significant areas of estimation, uncertainty and critical judgments in applying accounting policies that have the most significant effect on the amounts recognised in the consolidated financial statements is included in the following notes.

a) Judgements:

- Derecognition of trade receivables and hedge effectiveness- Note B.19 and B.20
- Classification and lease term determination of leasing arrangement Note B.8
- Reverse factoring: presentation of amounts related to supply chain financing arrangements in the balance sheet and in the statement of cash flows Note -18
- Investments accounted for using the equity method: whether the Group has significant influence over an investee.
 Note B.1
- Consolidation: whether the Group has de facto control over an investee. Note B.1
- Assessment of uncertain tax treatments. Note B.14
- Assessment of classification and recognition of government grant. Note B.15

b) Assumptions and estimation uncertainties:

- Fair value measurement of derivative instruments Note B.21
- Assessment of useful life of property, plant and equipment and intangible asset Note B.4 & B.5
- Estimation of assets and obligations relating to employee benefits (including actuarial assumptions) Note B.16
- Assessment of impairment of financial assets and non-financial assets Note B.19 and B.9
- Recognition and measurement of contingencies: key assumptions about the likelihood and magnitude of an outflow of resources – Note B.12
- Recognition and estimation of tax expense including determination of applicable tax rate for measuring deferred tax balances— Note B.14

At March 31, 2025, there was no recognised deferred tax liability (Previous year: Nil) for taxes that would be payable on the unremitted earnings of certain of Subsidiaries of SRF Limited. This liability was not recognised because the SRF Limited "Subsidiary' controls the dividend policy of its subsidiaries i.e., SRF Limited 'Subsidiary' controls the timing of reversal of the related taxable temporary differences and it is probable that they will not reverse in the near future.

Deferred tax asset recognised on unabsorbed carried forward losses of subsidiaries of the group to the extent to which management considered it probable that future taxable profits would be available against which such losses can be used. ≘

*The Group participates in a supply chain financing arrangement (SCF) which is disclosed under trade payables / other financial liabilities enabling suppliers to take early payment by selling their receivables from the group. The Group has not derecognised the original liabilities to which the arrangement applies because neither a legal release was obtained nor the original liability and the payment terms are modified on entering into the arrangement. The Group therefore discloses such amounts within trade payables / other financial liabilities because the nature and function of the financial liability remains same.

NOICS .

During the year ended March 31, 2025, interest income of Rs 308.00 lakhs has been recognised based on the appeal effect received from income tax Assessing Officer in respect of order of ITAT for the Assessment year 2008-09. However, since the interest income for the complete relevant period was not granted by the assessing officer, a writ petition has been filed by the Subsidiary 'SRF Limited' before Hon'ble Delhi High Court for grant of additional interest from the begining of the relevant assessment year.

Related remaining interest income in respect of assessment years 2008-09 and 2009-10 will be considered in the period in which a requisite level of certainty is achieved.

Considering that the in-principle matter of taxability of CERs is yet to attain a finality, Subsidiary 'SRF Limited' will continue to re-assess its tax position, including in relation to other assessment years, and will consider their impact in the relevant period.

⁽i) During the year ended March 31, 2024, Subsidiary 'SRF Limited' had reassessed its uncertain tax position in relation to past years on taxability of income from sale of Carbon Emission Reduction Certificates (CER's) and had written back Rs. 9,805.90 lakhs in respect of assessment years 2008-09 and 2009-10 as 'Tax adjustments in relation to earlier years' after taking into consideration favourable orders received from Income Tax Appellate tribunal ("ITAT") in relation to the above assessment years, elapse of statutory time for further appeal by tax authorities and favourable judicial precedents.

- ** Amount deposited against contingent liability Rs. 653.65 lakhs (Previous year: Rs. 653.65 lakhs)
- *** Amount deposited against contingent liability Rs. 6,069.39 lakhs (Previous year: Rs. 6,341.78 lakhs). Contingent liabilities includes the following matters:
- (i) Demand/ rectification Orders received in earlier years in respect of assessment years 2017-18 and 2018-19 having a tax implication of Rs. 1,995.83 lakhs (Previous year Rs. 1,995.83 lakhs) and Rs. 5,794.26 lakhs (Previous year Rs. 5,794.26 lakhs) respectively on account of transfer pricing adjustments, disallowance of research and development expenditure, etc. SRF Limited (Subsidiary) has filed an appeal before Income Tax Appellate Tribunal against the said orders.
- (ii) Final Assessment Order for assessment year 2020-21 received in the current year having adjustment of Rs. 4,838.55 lakhs with tax implication of Rs. 1,690.78 lakhs (Previous year draft assessment order received with tax adjustments of Rs. 17,850.00 lakhs) on account of transfer pricing adjustments, disallowance u/s 14A and for generation of power from captive power plants, etc. SRF Limited (Subsidiary) has filed an appeal before Income Tax Appellate Tribunal against the said order."
- (iii) Final Assessment Order for assessment year 2021-22 received in the current year having adjustment of Rs. 9,826.67 lakhs with tax implication of Rs. 5,419.33 lakhs (Previous year draft assessment order received with tax adjustments of Rs. 25,855.32 lakhs and order under section 143(1) with a demand of Rs. 13,073.85 lakhs) on account of transfer pricing adjustments, disallowance for research and development expenditure and for generation of power from captive power plants, etc. SRF Limited (Subsidiary) has filed an appeal before Income Tax Appellate Tribunal against the said order. Also, refund aggregating to Rs. 5,733.81 lakhs (previous year Rs. 5,733.81 lakhs) for different assessment years have been adjusted against the said demand.
- (iv) Intimation order under section 143(1) received in the previous year for assessment year 2022-23 with a demand of Rs. 6,875.71 lakhs for which SRF Limited (Subsidiary) has filed rectification application before Assessing Officer and an appeal before CIT(Appeals).
- ^ Amount deposited against contingent liability Rs. 105.00 lakhs (Previous year: Rs. 105.00 lakhs) for assessment year 2017-18 for which appeal has been filed with Commission of Income Tax (CIT).
- ****Amount deposited against contingent liability Rs. 904.55 lakhs (Previous year: Rs. 904.55 lakhs). Contingent liability includes demand by Madhya Pradesh Paschim Kshetra Vidyut Vitaran Company Ltd. (MPPKVV Ltd) of Rs. 872.81 lakhs (Previous year: Rs. 872.26 lakhs).

All the above matters are subject to legal proceedings in the ordinary course of business. In the opinion of the management, the legal proceedings, when ultimately concluded, are not likely to have a material effect on the results of the operations or financial position of the group.

- b. (i) SRF Limited (Subsidiary) has been served with show cause notices regarding certain transactions as to why additional customs / excise duty / service tax / goods and service tax amounting to Rs. 2,421.89 lakhs (Previous year: Rs. 4,299.55 lakhs) should not be levied. An amount of Rs.15.19 lakhs (Previous year: Rs. 715.19 lakhs) has been deposited against such show cause notices. SRF Limited (Subsidiary) is of the view that the contention of the respective departments is not tenable and hence the show cause notices may not be sustainable.
 - (ii) SRF Limited (Subsidiary) has received a draft Assessment Order for assessment year 2022-23 in which adjustments amounting to Rs. 19,713.34 lakhs are proposed on account of adjustments while passing order under section 143(1), transfer pricing adjustments, disallowance u/s 80G and for generation of power from captive power plants, etc. which are pending before Dispute Resolution Panel as on March 31, 2025. Based on the facts of the case and the management's assessment, the Company is of the view that the proposed adjustments are not likely to sustain.
- c. The amounts shown above represent the best possible estimates arrived at on the basis of available information. The uncertainties and possible reimbursements are dependent on the outcome of different legal processes which have been invoked by the SRF Limited (Subsidiary), or by the claimant, as the case may be, and therefore, cannot be predicted accurately or relate to a present obligations that arise from past events where it is either not probable that an outflow of resources will be required to settle or a reliable estimate cannot be made.

41. EMPLOYEE BENEFITS

41.1 Defined contribution plans:

Amounts recognized in the statement of profit and loss are as under:

Indian entities	Year ended March 31, 2025 Rs./lakhs	Year ended March 31, 2024 Rs./lakhs
Superannuation fund (Refer to note (i) below)	46.10	47.67

Foreign subsidiaries Contribution to provident fund	March 31, 2025	March 31, 2024
•	March 31, 2025 Rs./lakhs	March 31, 2024 Rs./lakhs
Contribution to provident fund	March 31, 2025 Rs./lakhs 186.79	March 31, 2024 Rs./lakhs 182.08

The expenses incurred on account of the above defined contribution plans have been included in Note 32 "Employee Benefits Expenses" under the head "Contribution to provident and other funds".

(i) Superannuation fund

The group makes contributions to a Trust which in turn contributes to ICICI Prudential Life Insurance Company Limited. Apart from being covered under the Gratuity Plan described below, the employees of the group also participate in a defined contribution superannuation plan maintained by the group. The group has no further obligations under the plan except making annual contributions based on a specified percentage of each covered employee's salary. From November 1, 2006, the group provided an option to the employees to receive the said benefit as cash compensation along with salary in lieu of the superannuation benefit. Thus, no contribution is required to be made for the category of employees who opted to receive the benefit in cash.

(ii) Provident fund administered through Regional Provident Fund Commissioner

All employees are entitled to Provident Fund benefits as per the law. For certain category of employees the group administers the benefits through a recognized Provident Fund Trust. For other employees contributions are made to the Regional Provident Fund Commissioners . The Government mandates the annual yield to be provided to the employees on their corpus. This plan is considered as a Defined Contribution Plan. For the first category of employees (covered by the Trust), the group has an obligation to make good for the shortfall, if any, between the yield on the investments of the trust and the yield mandated by the Government and these are considered as Defined Benefit Plans and are accounted for on the basis of an actuarial valuation.

41.2 Defined benefit plans

The group sponsors funded defined benefit plans for qualifying employees. The defined benefit plans are administered by separate funds which are legally separate from the group. These plans are:

- (a) Gratuity
- (b) Provident fund for certain category of employees administered through a recognized provident fund trust.
- (c) Legal Severance pay & Health care (Unfunded) as applicable with respect to foreign entities
- (i) These plans typically expose the group to actuarial risks such as investment risk, interest rate risk, longevity risk and salary risk.

Investment Risk

The probability or likelihood of occurrence of losses relative to the expected return on any particular investment.

Salary Risk

The present value of defined benefit plan is calculated with the assumption of salary increase rate of plan participants in future. Deviation in rate of increase in salary in future for plan participants from the rate of increase in salary used to determine the present value of obligation will have a bearing on the plan's liability.

Interest Risk

The plan exposes the group to the risk of fall in interest rates. A fall in interest rates will result in an increase in the ultimate cost of the providing the above benefits and will thus result an increase in value of the liability.

Longevity Risk

The present value of defined benefit plan liability is calculated by reference to the best estimate of the mortality of the plan participants both during and after the employment. An increase in the life expectancy of plan participants will increase the plan's liability.

(ii) The principal assumption used for the purpose of the actuarial valuation were as follows:

- 41-50	4.50%	4.00%
- 51 onwards	1.50%	1.50%

The cost of the defined benefit plans and other long term benefits are determined using actuarial valuations. An actuarial valuations involves making various assumptions that may differ from actual developments in the future. These includes the determination of the discount rate, future salary increases and mortality rate. Due to these complexities involved in the valuation, the probability are highly sensitive to the changes in these assumptions. All assumptions are reviewed at each reporting date.

The present value of defined benefit obligation and the related current service cost and past service cost have been measured using projected unit credit method.

Long Term Retention Pay

The group has a Long Term Retention Pay Plan which covers employees selected on the basis of their current band and their long term value to the Company. The incentive is payable in three year blocks subject to achievement of certain performance ratings. The Company also has a scheme for talent retention of certain identified employees under which an incentive is payable over a period of three years.

42. EMPLOYEE SHARE BASED PAYMENTS

SRF Limited 'Subsidiary' has an Employee Share Purchase Scheme (SRF Long Term Share Based Incentive Plan) to provide equity settled share based payments to eligible employees. Under the said Scheme, SRF Limited 'Subsidiary' has issued equity shares to the eligible employees by entering into a Share Grant Agreement and executing a Share Grant Acceptance Letter and paying the exercise price, if any, as prescribed by the Nomination and Remuneration Committee at the time of grant. Subscribed shares have complete voting and dividend rights. Employees who have been granted equity share are required to pledge their shares as part of the Share Grant Agreement between SRF Limited 'Subsidiary', Eligible Employee and the SRF Employees Welfare Trust ('Trust'). In case of exit/ termination of employees before their retirement or such other period as may be decided by the Nomination and Remuneration Committee, the shares shall get transferred to the Trust. Such shares will then be issued to another set of eligible employees as and when the Nomination and Remuneration Committee decides subject to the applicable rules and regulations.

The expenses related to the grant of shares under the Scheme are accounted for on the basis of fair value of the share on the grant date (which is the market price of SRF Limited 'Subsidiary' share on the date of grant less exercise price). The fair value so determined is expensed on a straight line basis over the term of the grant.

The movement of number of equity shares granted, their fair value and the share based payment expense recognised during the year are as under:

	Year ended March 31, 2025	Year ended March 31, 2024
Number of equity shares:	<u> </u>	<u> </u>

The shares outstanding as on March 31st, 2025 are pledged for a period upto October 31, 2026.

43. SEGMENT REPORTING

Based on the guiding principles laid down in Indian Accounting Standard (Ind AS) - 108 "Segment Reporting", the Chairman and Managing Director of the Company is the Chief Operating Decision Maker (CODM) and for the purposes of resource allocation and assessment of segment performance, the business of the Group is segregated in the segments below:

- Technical Textiles business: includes nylon tyre cord fabric, belting fabric, polyester tyre cord fabric and its research and development
- Chemicals business: includes refrigerant gases, industrial chemicals, speciality chemicals, fluorochemicals & allied products and its research and development.
- Performance Films & Foil Business (earlier named as Packaging Film business): includes polyester films, polypropylene
 films and aluminium foil.
- Others: include coated fabric, laminated fabric, other ancillary activities, Investment activities, Real Estate, Education and allied activities.

Segment revenue, results and capital employed include the respective amounts identifiable to each of the segments. Other unallocable expenditure includes expenses incurred on common services provided to the segments, which are not directly identifiable.

In addition to the material accounting policies applicable to the business segments as set out in note 1 above, the accounting policies in relation to segment accounting are as under:

a) Segment revenue and expenses

Joint revenue and expenses of segments are allocated amongst them on a reasonable basis. All other segment revenue and expenses are directly attributable to the segments. These amounts relate to continuing operations, unless otherwise stated.

b) Segment assets and liabilities

Segment assets include all operating assets used by a segment and consist principally of operating cash, trade receivables, inventories and property plant and equipment and intangible assets, net of allowances and provisions, which are reported as direct offsets in the consolidated balance sheet. Segment liabilities include all operating liabilities and consist principally of creditors and accrued liabilities and do not include deferred income taxes. While most of the assets / liabilities can be directly attributed to individual segments, the carrying amount of certain assets / liabilities pertaining to two or more segments are allocated to the segments on a reasonable basis.

44. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT

44.1 Capital Management

The group manages its capital to ensure that it will be able to continue as a going concern and provide reasonable return to the shareholders by maintaining a reasonable balance between debt and equity. The capital structure of the group consists of net debt (borrowings net of cash and cash equivalents, deposits accounts with maturity beyond three months upto twelve months and investments) and total equity of the group. The group is not subject to any externally imposed capital requirements. The group's management reviews the capital structure of the group on periodic basis. As part of its review, the management considers the cost of capital and risk associated with each class of capital. The group also evaluates its gearing measures using Net Debt Equity Ratio to arrive at an appropriate level of debt and accordingly evolves its capital structure.

The following table provides the details of the debt and equity at the end of the reporting periods:

			2,562.85	573.36	2,562.85	573.36

The following methods / assumptions were used to estimate the fair values:

- (a) Fair valuation of financial assets and liabilities is considered as approximate to respective carrying amount.
- (b) Fair valuation of financial assets and financial liabilities has been disclosed to be same as carrying value as there is no significant difference between carrying value and fair value.
- (c) Fair value of other borrowings is estimated by discounting future cash flows using current rates (applicable to instruments with similar terms, currency, credit risk and remaining maturities) to discount the future payouts.
- (d) The fair value is determined by using the valuation model/technique with observable/non-observable inputs and assumptions.

Hierarchy levels:

Level 1:

Quoted prices in the active market: This level of hierarchy includes financial assets that are measured by reference to quoted prices in the active market.

Level 2:

Valuation techniques with significant observable inputs: This level of hierarchy includes items measured using inputs other than quoted prices included within Level 1 that are observable for such items, either directly or indirectly. This level of hierarchy consists of over the counter (OTC) derivative contracts, open ended mutual funds, bonds and debentures.

Level 3:

Valuation techniques with significant unobservable inputs: This level of hierarchy includes items measured using inputs that are not based on observable market data (unobservable inputs). Fair value determined in whole or in part, using a valuation model based on assumptions that are neither supported by prices from observable current market transactions in the same instruments nor based on available market data. The main item in this category are unquoted equity instruments, compulsorily convertible preference shares and other investments.

The fair value of the financial instruments are determined at the amount that would be received to sell an asset in an orderly transaction between market participants. The following methods and assumptions were used to estimate the fair values:

- Investments in mutual funds, bonds and debentures: Fair value is determined by reference to quotes from the financial institutions.
- (ii) Derivative contracts: The group has entered into various foreign currency contracts and interest rate swaps contracts to manage its exposure to fluctuations in foreign exchange rates and interest rate respectively. These financial exposures are managed in accordance with the group's risk management policies and procedures. Fair value of derivative financial instruments are determined using valuation techniques based on information derived from observable market data, i.e., mark to market values determined by the authorized dealers banks and forward exchange rates at the balance sheet date.

(iii) Unquoted equity investments and convertible debentures: Fair value is determined based of the recoverable value as per agreement with the investee.

As at March 31, 2024	50,895.05
Movement during the year	2,945.52
As at March 31, 2025	53,840.57

Sensitivity of the fair value measurement to changes in unobservable inputs for financial instruments in Level 3 level of hierarchy is insignificant.

44.3 Financial Risk Management

The group is exposed to various financial risks arising from its underlying operations and finance activities. The group is primarily exposed to market risk (i.e. interest rate and foreign currency risk) and to credit risk and liquidity risk. The group's Corporate Treasury function plays the role of monitoring financial risk arising from business operations and financing activities.

Financial risk management within the group is governed by policies and guidelines approved by the senior management and the Board of Directors. These policies and guidelines cover interest rate risk, foreign currency risk, credit risk and liquidity risk. group policies and guidelines also cover areas such as cash management, investment of excess funds and the raising of short and long-term debt. Compliance with the policies and guidelines is managed by the Corporate Treasury function within the group. Review of the financial risk is done on a monthly basis by the Managing Director and on a quarterly basis by the Board of Directors. The objective of financial risk management is to contain, where deemed appropriate, exposures on net basis to the various types of financial risks mentioned above in order to limit any negative impact on the group's results and financial position.

In accordance with its financial risk management policies, the group manages its market risk exposures by using specific type of financial instruments duly approved by the Board of Directors as and when deemed appropriate. It is the group's policy and practice neither to enter into derivative transactions for speculative purpose, nor for any purpose unrelated to the underlying business. The Board of Directors / Managing Director reviews and approves policies for managing each of the above risks.

44.3.1 Market Risk

Market risk is the risk that the fair value of future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises of interest rate risk and foreign currency risk. Financial instruments affected by market risk includes loans and borrowings, deposits, investments and derivative financial instruments. The group enters into derivative contracts as approved by the Board to manage its exposure to interest rate risk and foreign currency risk.

A. Foreign Currency Risk Management

Foreign currency risk also known as Exchange Currency Risk is the risk that the fair value or future cash flows of an exposure will fluctuate because of changes in foreign exchange rates. Foreign currency risk in the group is attributable to group's operating activities, investing activities and financing activities.

In the operating activities, the group's exchange rate risk primarily arises when revenue / costs are generated in a currency that is different from the reporting currency (transaction risk). In compliance with the Board approved policy, the Group manages the net exposure on a rolling 12 month basis and for exposures between a period of 12 to 36 months, hedging is done based on specific exposure. The information is monitored by the Board of Directors on a quarterly basis. This foreign currency risk exposure of the group are mainly in U.S. Dollar (USD), Euro (EUR), Japanese Yen (JPY) and British pound sterling (GBP). The group's exposure to foreign currency changes for all other currencies is not material.

The summary quantitative data about the group's exposure to currency risk at the end of reporting periods expressed in Rs. are as follows:

Foreign currency sensitivity analysis

The group is mainly exposed to changes in USD, EURO, JPY and GBP exchange rates.

The following table details the group's sensitivity to a 1% increase and decrease in the Rs. against the relevant foreign currency. The sensitivity analysis includes only outstanding foreign currency denominated monetary items as tabulated above and adjusts their translation at the period end for 1% change in foreign currency rates. This analysis assumes that all other variables, in particular interest rates, remain constant. A positive number below indicates an increase in profit before tax or vice-versa.

Foreign exchange derivative and non-derivative financial instruments

The group uses derivative as well as non derivative financial instruments for hedging financial risks that arise from its commercial business or financing activities. The group's Corporate Treasury team manages its foreign currency risk by hedging transactions that are expected to occur within 1 to 36 months for hedges of forecasted sales, purchases, loans and liabilities and capital expenditures. When a derivative is entered into for the purpose of being a hedge, the group negotiates the terms of those derivatives to match the terms of the hedged exposure. For hedges of forecast transactions the derivatives cover the period of exposure from the point the cash flows of the transactions are forecasted up to the point of settlement of the resulting receivable or payable that is denominated in the foreign currency. All identified exposures are managed as per the policy duly approved by the Board of Directors.

The following table details the foreign currency derivative contracts outstanding at the end of the reporting period:

B. Interest Rate Risk Management

Interest rate risk arises from movements in interest rates which could have effects on the group's net income or financial position. Changes in interest rates may cause variations in interest income and expenses resulting from interest-bearing assets and liabilities. The group's exposure to the risk of changes in market interest rates relates primarily to the group's debt obligations with floating interest rates.

The group manages its interest rate risk by having a portfolio of fixed and variable rate loans and borrowings. The group enters into interest rate swaps, in which it agrees to exchange, at specified intervals, the difference between fixed and variable rate interest amounts calculated by reference to an agreed principal amount outstanding at the time of inception of the swap. Out of the total long term borrowings, the amount of fixed interest loan aggregate Rs. 1,562.50 lakhs and floating interest loan aggregates Rs.2,78,045.71 lakhs (Previous year: Fixed interest loan Rs. 43,888.45 lakhs and Floating interest loan Rs. 2,89,902.98 lakhs)

The following table demonstrates the sensitivity to a reasonably possible change in interest rates on that portion of loans and borrowings affected. With all other variables held constant, the group's profit before tax is affected through the impact on floating rate borrowings, as follows:

		ended 31, 2025	Year ended March 31, 2024		
	Rs. loans interest rate increases by 0.50 %	Foreign currency loans interest rate increases by 0.15 %	Rs. loans interest rate increases by 0.50 %	Foreign currency loans interest rate increases by 0.15 %	
Decrease in profit	(94.00)	(388.87)	(175.00)	(404.85)	

In case of decrease in interest rate by above mentioned percentage, there would be a comparable positive impact on the profit before tax as mentioned above.

Investment Risks

The primary goal of the Group's investment is to maintain liquidity along with meeting group's strategic purposes. Depending upon the investment strategy at inception, management classifies certain investments as FVTPL. The following table details the group's sensitivity to a 1% increase and decrease in the price of instruments.

Particulars	Year ei March 3		Year ended March 31, 2024	
	Market price increase by 1%	Market price decrease by 1%	Market price increase by 1%	Market price decrease by 1%
Impact on profit / (loss) for the year	771.03	771.03	471.48	(471.48)

44.3.2 Credit Risk Management

Credit risk is the risk that counterparty will not meet its obligations under a financial instrument or customer contract, leading to a financial loss. The group is exposed to credit risk from its operating activities (primarily trade receivables, loans and other financial assets) and from its financing activities, including deposits with banks and financial institutions, foreign exchange transactions and other financial instruments. The Group does not require collateral in respect of trade receivables, loans and contract assets.

Credit risk from balances with banks and financial institutions is managed by the group's treasury department in accordance with the group's policy. Investments of surplus funds are made only with counterparties who meet the parameters specified in Investment Policy of the group. The investment policy specifies the limits of investment in various categories of products so as the minimize the concentration of risks and therefore mitigate financial loss due to counterparty's potential failure.

The derivatives are entered into with reputed and well established bank and financial institution.

The cash and cash equivalents and other bank balances are held with banks, financial institution and other counterparties, which are rated AA or above. The Group considers that its cash and cash equivalents have low credit risk based on the external credit ratings of the counterparties.

The Group limits its exposure to credit risk by investing in liquid debt securities and only with counterparties that have a credit rating of at least AA or above. The group permits exposure in corporate bonds only up to the specified amount as per its Board policy. Also, mutual fund investments are permitted only in those funds where the corpus size is more than Rs 2,00,000 lakhs. The Group monitors its investment portfolio on continues basis to assess whether there has been a significant increase in credit risk whether or not reflected in the published ratings.

Expected credit loss on financial assets:

To manage credit risk for trade receivables, the group establishes credit approvals and credit limits, periodically assesses the financial reliability of customers, taking into account the financial conditions, economic trends, analysis of historical bad debts and aging of such receivables.

With regards to all financial assets with contractual cash flows other than trade receivable, management believes these to be high quality assets with negligible credit risk. The management believes that the parties, from which these financial assets are recoverable, have strong capacity to meet the obligations and where the risk of default is negligible and accordingly no provision for excepted credit loss has been provided on these financial assets other than as detailed below.

Loss allowance for the following financial assets have been recognised by the group:

	Note No.	As at March 31, 2025	As at March 31, 2024
Loans	5	(374.24)	(324.24)
Trade receivables	4	(461.97)	(756.35)
		(836.21)	(1,080.59)

Movement of loss allowance:

	Loans	Trade receivables
As at April 1, 2023	324.24	530.07
Provided during the year	50.00	421.51
Reversed during the year	(50.00)	(195.23)
As at March 31, 2024	324.24	756.35
Provided during the year	50.00	159.65
Reversed during the year	-	(453.52)
As at March 31, 2025	374.24	462.48

Other than financial assets mentioned above, none of the group's financial assets are impaired, as there are no indications that defaults in payments obligation would occur.

44.3.3 Liquidity Risk Management

Liquidity risk is the risk of non-availability of financial facilities available to the group to meet its financial obligations. The group's objective is to maintain a balance between continuity of funding and flexibility through the use of money market instruments, bank overdrafts, bank loans, debentures and other types of facilities. The liquidity management is governed by the Board approved liquidity management policy. Any deviation from the policy has to be approved by the Treasury Management comprising of Chairman and Managing Director, Chief Financial Officer and Treasury Head. The group assesses the concentration of risk with respect to refinancing its debt, guarantee given and funding of its capital expenditure according to needs of the future. The group manages its liquidity by holding appropriate volumes of liquid assets which are available for its disposal on T +1 basis and by maintaining open credit lines with banks.

The Group has a secured bank loans which contain loan covenants. A future breach of any covenant may require the Group to repay the loans earlier than their original payment date. These covenants are monitored by the treasury department and regularly reported to management to ensure compliance with the agreement.

The Group also participates in a supply chain financing arrangement SCF) with the principal purpose of facilitating efficient payment processing of supplier invoices. The SCF allows the Group to centralise payments of trade payables to the bank rather than paying each supplier individually. While the SCF does not extend payment terms beyond the normal terms agreed with other suppliers that are not participating, the programme assists in making cash outflows more predictable. Also refer note 18.

Also refer note 4 for receivables purchase agreements entered into by the group as a part of its liquidity Risk Management Policy.
